

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. The Solar Cycle embraces a period of 28 years.

The Roman Indiction is a cycle of 15 years.

The Lunar Cycle is 235 synodical revolutions of the moon = 19 years.

The Epact denotes the age of the moon on the first day of January.

ECLIPSES IN THE YEAR 1889.

There will be five eclipses in the year 1889, three of the sun and two of the moon, only the first and second of which will be visible in the United States.

1. A Total Eclipse of the Sun, January 1, partly visible at Washington, and throughout North America. Sun enters shadow, at Washington, at 27 minutes past 4 p. m., ending at sunset. The greater part of eclipse total in portions of California and Nevada. Magnitude of the eclipse = 1.647 (Moon's diameter = 1).

2. A Partial Eclipse of the Moon January 16, in the evening. Visible in the United States, North and South America, Europe and Africa. Beginning of eclipse at Washington, 10.50 p. m., ending at 1.53 a. m. on the 17th.

3. An Annular Eclipse of the Sun, June 28. Invisible in the United States; visible in the East Indies and South Africa.

4. A Partial Eclipse of the Moon, July 12. Invisible at Washington, and generally in North America.

5. A Total Eclipse of the Sun, December 22. Invisible in the United States; visible in Africa, and to the northern half of South America.

THE NEW STANDARD TIME.

In 1884, by general agreement and partial legislation, four standard meridians were adopted within the United States, by which railway trains are run and local time regulated. These meridians are 15 degrees, or 900 miles, apart, there being a difference of just one hour in time from one meridian to another, as there are 360° in the earth's circumference, which divided by 24 hours gives 15 degrees to an hour. The Eastern meridian, 75° W. from Greenwich, passes 4 minutes west of New York City. The Central meridian, 90° W. longitude, passes (nearly) through New Orleans and St. Louis, and Chicago lies about 10½ minutes east of it. The Mountain standard meridian, 105° W. long., passes near Pike's Peak, Rocky Mountains. The Pacific meridian, 120° W. long., is near the coast, San Francisco being 9½ m. west of it. The figures in these calendar-pages will be correct for places on the standard meridians; for places east of any meridian, and within 7½ degrees of it, one minute of time for each quarter of a degree of longitude (= 15 miles nearly), or 4 minutes for each degree, must be subtracted from the almanac figures. For a place west of any meridian, and within 7½ degrees of it, add one minute for each quarter of a degree to the almanac figures. In computing standard time of rising or setting of sun or moon for any place, select the city or State in the calendar that is nearest in latitude to the place wanted. Any United States map gives the distances in longitude of most places from the several standard meridians, sufficiently near to make practical application of the rule.

Years of the Cen- tury. N. B.—Leap years being in- serted twice, the first number is used when the given date is in January, or Feb- ruary; the second, for the other months.				1	2	3	4	4	5	6	EXPLANATION OF THE CALENDAR. 1. The days of the different months as given above, fall, in any year, on the week- day found opposite the century (Old or New Style) in which the year occurs, and over the year thereof. 2. Find the year in "Years of the Cen- tury;" follow up the column to the day on the same horizontal line with the given cen- tury. Find this day under the given month. The figures above it in the same vertical line show the dates of that day during the given month, and the week- days in the same hori- zontal line to the right or left have their re- spective dates above them, thus forming the entire calendar for that month and year.

EXAMPLE 1.—To find the day of the week for July 4th, 1881. Opposite Century 19, New Style, and over year 81, is *Saturday*. Under July, Saturday falls in the vertical line under 2, and the second day to the right following, under 4, is Monday, July 4th.

EXAMPLE 2.—To find the day of the week on which Columbus discovered America, October 12th, 1492, Old Style. Opposite Century 15, Old Style, and over 92 in black letter (it being leap year,) is *Monday*. Therefore, October 8th was Monday; and the line of week-days in which Monday falls under October (which is the sixth,) with the days of the month above, constitute the entire Calendar for October, 1492, Old Style, and the 12th, as seen, falls on Friday.

EXAMPLE 3.—To find the 1st Tuesday after the 1st Monday in November, (Election Day,) 1882. Find 82 in "Years of the Century;" follow up the column to the day on a line with the figure 19 of the "Centuries, New Style:" this will be found to be Sunday. Under November, Sunday is found in the vertical line under 5, of the calendar above, Monday to the right of it under 6, and Tuesday under 7. So the Tuesday after the first Monday, is the 7th.

THE TIME OF HIGH WATER

at the places following may be found approximately for each day by adding to or subtracting from the time of high water at New York the hours and minutes annexed.

EXAMPLE.—To ascertain at what hour it will be high tide at Boston on the 1st of August, find the time of high water at New York under August 1st, which is 10.50 A. M., then add 3 hours 22 minutes, as found in the table of Tide Constants under Boston, and we have 2.12 P. M. as the hour of high water at Boston August 1st, 1889.

NOTE.—The hours of high water in the calendar pages are the morning hours—from midnight to noon—throughout the year, as computed for the U. S. Coast Survey. To find the time of next high water, or the afternoon tide—from noon to midnight—add 12 h. 25 m. in each day. The result will be the proximate hour of evening tide. For low water, add 6 h. 12 m., approximately, to the time of high water.

Explanation of the Calendar.

THE two natural divisions of time are the day, of 24 hours, representing one revolution of the earth on its axis, and the year, 365 days, approximately representing one revolution of the earth around the sun. The month represents (nearly) the period of the moon's revolution round the earth (about $29\frac{1}{2}$ days), while the week is approximately one-fourth of this.

By the Julian Calendar, established by Julius Cæsar, 46 B.C., the months were reconstructed; and the Roman year was regulated entirely by the sun, the lunar year being abolished. Thirty-one days were given to the 1st, 3d, 5th, 7th, 8th, 10th, and 12th months, and 30 days each to the rest, except February, which on every fourth year received an intercalary day, made by the *sexto Calendas Martius*, whence "leap-year" came to be called *Bissextile*. As the Julian year had $365\frac{1}{4}$ days, its length exceeded the true solar year by 11m. 14 sec., so that the equinox in the course of centuries fell back several days. To correct this error, Pope Gregory XIII. in 1582 reformed the calendar by suppressing ten days, restoring the equinox to March 21. The Gregorian Calendar also made every year which is divisible by four without a remainder a leap year, except the centesimal years, which are only leap years when the first two figures are divisible by four: thus 1600 was a leap year, 1700, 1800, and 1900 common years, 2000 a leap year, etc. The length of the mean year is 365 d. 5h. 49m. 12sec., exceeding the true solar year nearly 26 sec., which error amounts only to 1 day in 8 325 years.

The Gregorian Calendar was adopted by Germany in 1700, and by English law in 1752, when the Julian Calendar, or *old style*, gave place to the *new style*, by dropping eleven days from the month of September, 1752.

The festival of Easter, commemorating the resurrection of Christ, used to be observed on the 14th day of the moon, i.e., near the full moon—the same as the Jewish Passover. But the Council of Nice, A.D. 325, ordered Easter to be celebrated on the Sunday next succeeding the full moon that comes on or next after the vernal equinox—March 21st; thus making Easter and the related feast and fast days movable holidays.

JANUARY is so named from the Roman *Janus*, who was the porter of heaven, having the surname of *Patulcus*, the opener. He presided over the beginning or opening of everything, hence the first month of the year was called after him, when the Roman year was altered by *Numa Pompilius* (in the 7th century B.C.), from ten months beginning in March, to twelve months by adding January and February. In his original character *Janus* was the god of the sun, and worshipped as such by the *Etruscans* and the *Romans*. The temple of *Janus* (which was really a covered passage or gate at Rome) was left open in war as a symbol that the god had gone out to assist the Roman arms, while it was continually shut in time of peace.

On New Year's Day, which was the festival of the god *Janus*, the *Romans* gave presents to one another. Thus ancient was the origin of the modern custom of New Year's presents and first of January festivities.

FEBRUARY, according to some, derives its name from the Latin *februare*, signifying to expiate or purify, as the Romans had a custom of general lustrations and purifications in the latter part of that month. More generally, February is traced to the Roman divinity *Februus*, afterward identified with the god Pluto, of the lower world. Still another origin is found in the goddess *Februa*, supposed to be the same as Juno; and Dr. Foster says, "The evident relation between the *Februata* Juno and the *Purificata* Virg. Maria is one of the most striking instances of the connection between Pagan and Christian rites and festivities as to the period of their occurrence."

In every fourth year, February has 29 days, instead of 28, and the years (thus having 366 days, instead of 365, and styled Leap-years) are those which are divisible by 4 without a remainder—as 1884, 1888, 1892, 1896, 1904, etc. The exceptions are the centenary years which are not multiples of 400, as it was found in the Gregorian reform of the calendar that the Julian intercalation involved an error amounting to 3 days in every 400 years. Thus, while 1600 and 2000 are leap-years, the three intervening centenary years are common years of 365 days.

The month of MARCH was named from Mars (Lat. *Martius*), the Roman god of war. This divinity was known as Father Mars, and next to Jupiter he enjoyed the highest honors at Rome, of which city Jupiter, Mars, and Quirinus were the three tutelary divinities. March was the first month in the early Roman calendar, and the legal year began with March 25 even in England, until the change from Old Style to New Style in 1752. (See explanation of the calendar, p. 5.) The custom of reckoning the year according to the Old Style is still retained in Russia, and even the financial year of Great Britain is reckoned from the 31st of March. In historical works, dates are frequently written thus: Feb. 11, 1732; the upper figures representing Old Style reckoning, and the lower New Style.

We also see dates between Jan. 1 and March 25 expressed thus: Jan. 30, 1648; meaning that the year was legally 1648 (O. S.), but by modern reckoning 1649 (N. S.).

APRIL (Lat. *Aprilis*), derived perhaps from *Aperire*, to open, because spring and the buds generally open in this month. Another derivation has been found in the dedication of this month by the Romans to Venus, goddess of buds and beauty, whose name in Greek was *Aphrodite*, whence *Aphrilis* or *Aprilis*. This is more fanciful than the first-named derivation, but the word-mongers are never daunted by difficulty, any more than by distance, in their etymologies.

In the French revolutionary calendar, April included most of their new season of *Germinal*, and the beginning of *Floreal*.

On the ancient monuments, *Aprilis* appears as a dancing youth with a rattle in his hand, thus symbolizing the gay and jocund spirit of spring.

All-Fools' Day (April 1) is traced through every country of Europe to the Hindoos, and even farther back—to the mistake of Noah in sending the dove out of the ark before the water had abated, on the Hebrew first day of the month.

MAY (Lat. *Maius*) was consecrated to Apollo among the Romans, and is probably derived from *Maia*, a feminine divinity worshipped at Rome, to whom sacrifices were offered on the first of May. Some philologists, however, hold that *Maius* is a contraction of *Magius*, derived from the Sanskrit root *mag* or *mah*, to grow.

The custom of observing May-day, or the first of May, with floral and festive ceremonies, is older than the Middle Ages, and is probably the lineal descendant of the Roman *Floralia*, or festivals in honor of *Flora*, celebrated from April 28 to May 2.

In England the custom of going out a-Maying is mentioned in Chaucer and Shakespeare. Before sunrise young people went to the groves to gather flowers and branches of foliage to adorn the village May-pole, around which the dancing was kept up. A queen of the May, the most beautiful girl in the village, was elected for crowning.

JUNE, the month of roses, has been commonly traced to Juno, worshipped at Rome as the queen of heaven. The connection is found in the fact that the month of June (said to have been called originally *Junonius*) was considered the most favorable period for marrying; and Juno was the great protector of the feminine sex, and believed especially to preside over marriage. Another origin is found by some in the Latin *Juniores*, the young men, to whom Romulus is said to have assigned it; and still another in *jungo*, to join (as in marriage).

The Anglo-Saxons called June "midsummer month."

In the northern United States June is the most delightful month of the year, when the flowers put on their richest bloom, and the birds warble their most musical songs, while the earth, the air, and the water teem with vigorous life, and the hours of the day far outnumber those of the night.

JULY.—This month derives its name from *Julius Cæsar*, who was born on the 12th of the month, originally called *Quintilis*, it having been the fifth month in the original Latin year, which began with March. The change of name was proposed by Mark Antony, and easily carried in the days of the great Julius.

This is the month of "dog-days," usually reckoned as beginning on the 3d of July and ending about the 11th of August. These days were so called from the star *Sirius*, or the dog-star, in the constellation of *Canis Major*, to which the extreme heat of mid-summer was superstitiously attributed. During these oppressively hot days it was also supposed that dogs are more likely to run mad than at other seasons.

AUGUST, like July, owes its name to the Roman Cæsars, the Emperor *Augustus* having followed in the footsteps of his illustrious predecessor by appropriating a month to himself. Formerly called *Sextilis*, or the sixth month, when Julius Cæsar changed the calendar it still continued *Sextilis* and had thirty days, while February had twenty-nine, and in leap-year thirty days. To gratify the vanity of Augustus, one day was taken by the obsequious Senate from February and added to August, so as to make his month equal in extent and dignity to July.

August is associated, at least in this country, with intense heat and welcome vacations; schools and colleges shut up, the cities pour themselves into the country, and seaside and mountain resorts are thronged.

SEPTEMBER is so called from the Latin *Septem*, seven, because it was the 7th month of the Roman year, which began with March, until the change of the calendar under the second King of Rome. Though September became then the 9th month, and October, November, and December the 10th, 11th, and 12th, respectively, instead of the 8th, 9th, and 10th, the ancient designations are still retained, in spite of their total inaccuracy—an instance of conservatism enduring through ages, and still perpetuated.

September is the month of harvest through large areas of the globe, and in Switzerland it is still called *Herbstmonat* (harvest month).

Harvest moon is the full moon nearest the autumnal equinox (Sept. 21), so called because it enables farmers to prolong the day's work during the autumnal harvest. In England and northern Europe the harvest moon rises near sunset several evenings successively; but this phenomenon is less marked in the United States because of our lower latitude. The recurrence of what was called an equinoctial storm at or about the time the sun crosses the equator has ceased to be (if in fact it ever was) a thing to be depended on.

OCTOBER (Lat. *octo*, eight) was the eighth month of the Roman calendar, before its reformation. This has given rise to the following quatrain:

“October has its name from *octo*, eight;
Though 'tis the truth, perhaps 'tis well to state,
Such sixes and such sevens the months were knocked to
That ten became translated into *octo*.”

The splendor of October in the country, when the air is crisp and full of electric en-
ergy, and the green forests change to the gorgeous and many-colored hues of autumn,
has been celebrated by many writers.

NOVEMBER (Lat. *novem*, nine) is now the eleventh month, instead of the ninth, as before the change of the Roman calendar.

Though frequently cold and blustering, November is redeemed almost every year, throughout a large region of the United States, by the delightful weather known as Indian Summer, when for days or weeks the sun pours its rays mildly through a haze, and the soft and genial air invites us abroad to enjoy, as it were, a second edition of summer before winter closes in.

November is also notable in the northern parts of the United States for its time-honored festival of Thanksgiving, which originated with the Pilgrim Fathers at Plymouth. Formerly celebrated on different Thursdays, as fixed by proclamation by the various State governors, Thanksgiving has now come to be generally observed on the last Thursday in November, as announced by Presidential proclamation.

DECEMBER (Lat. *decem*, ten), the tenth month of the early Romans, has become the twelfth, rounding out the year.

This is the month of the longest nights and the shortest days, as the winter solstice falls on the 21st of December.

When the French revolutionized the calendar in 1792, and gave the months new and significant names, December was cut in two, the first part of it becoming *Frimaire* (frosty) and the last *Nivose* (snowy).

As the month of the Christmas holidays, which continue, where fully celebrated, from December 24 to January 2, or even longer, December's cold and gloom are enlivened with the joyousness, generosity, and charity of the greatest festival in the calendar.

NOTE.—The Superintendent of the Census accompanies the tables from which the above summaries are condensed, by remarks expressive of the distrust which should attach to the results. The estimates are necessarily based on very imperfect data; their value is largely dependent upon the judgment of the multitude of officers making the returns; and such aggregate estimates of wealth spread over a wide expanse of territory furnish a task difficult, if not impossible. The returns for 1850 are regarded as far too low. The increase of values from 1860 to 1870 is much enhanced by the paper-money inflation, which swelled the figures in the census year 1870 to an average of perhaps 25 per cent. Again, in the valuations of 1850 and 1860 slaves were included in the 15 Southern States and the District of Columbia, while in 1870 no such item of property was included; and there was also a great depreciation in the value of real estate throughout the South in the decade 1860-1870, which included the civil-war period, 1861-65.

Table Exhibiting, by States, the Aggregate of Troops furnished to the Union Army, 1861-65, with Bounties Paid by States.

1) This gives colored troops enlisted in the States in rebellion; besides this, there were 92,576 colored troops, included (with the white soldiers) in the quotas of the several States; the 3d column gives the aggregate of colored, but many enlisted South were credited to Northern States.

2) This is the aggregate of troops furnished for all periods of service—from 3 months to 3 years time. Reduced to a uniform three years standard, the whole number of troops enlisted amounted to 2,320,272.

3) Virginia and West Virginia populations by census of 1860, as divided by counties in 1863.

4) This table is given from the Report of the Provost Marshal General in 1866, with the remark that much larger disbursements in bounties were made in some States, the aggregate not ascertainable.

IMMIGRATION INTO THE UNITED STATES, 1820-1887.

Compiled from the Reports of the Bureau of Statistics, Treasury Department.

PRIOR to the year 1820 no statistics of immigration were officially kept. By act of Congress, of March 2, 1819, Collectors of Customs were required to keep a record and make a quarterly return to the Treasury, of all passengers arriving in their respective districts from foreign ports; and these reports, published from time to time by the Treasury Department, constitute the sources of information as to the progress of immigration. The total number of foreign-born passengers arriving at the ports of the United States, from 1820 to 1887 inclusive, is given below. Prior to 1856, the figures show the whole number of aliens arriving, but from 1856 to 1887 inclusive, the number of immigrants only, *i. e.*, of foreign passengers settling in the United States.

It has been estimated that the whole number of aliens coming to the United States from 1789 to 1820, was about 250,000.

It is believed that the table given above will fairly represent the question of profit and loss in the cultivation of tobacco in 1879 in the various states of the Union. It will be observed that Tennessee stands lowest in the column which indicates profit. This is due to the peculiar condition of the tobacco market at the time the census was taken. Stocks of tobacco had accumulated, until prices coincided very nearly with the cost of production. All other states growing tobacco for exportation produced also some types peculiarly suited to the requirements of the domestic manufacturer, which brought good prices and elevated the general average of prices for such states. The profits in growing tobacco in Kentucky came from the production of the White Burley and yellow wrapper; in Illinois, from the production of the seed-leaf; in Missouri, from the production of sweet fillers and White Burley; and in Virginia from the production of yellow wrappers, bright "smokers," and sun-, air-, and fire-cured fillers. In consequence of the low scale of prices for shipping-leaf, and the margin for profit being reduced to such a low point, Tennessee, Missouri, Illinois, Indiana, Maryland, and other states growing tobacco mainly for exportation, show relatively a diminished production. On the other hand, all those states which have grown types suitable for domestic consumption, have generally ascended rapidly in the rank of production. Pennsylvania, which was twelfth in rank in 1870, takes the third rank in 1880. Ohio passes from the fifth to the fourth, while Maryland and Tennessee descend from the fifth and third rank respectively to the seventh and fifth, and Missouri passes from the seventh to the ninth rank.

Profits in the culture of tobacco have been in direct proportion, first to its suitability to domestic consumption; and, secondly, to the amount of fertilization practiced by the growers in its cultivation.

Ninety-four per cent. of all the product grown for market in 1879, north of the parallel of 39° 44' was classed as seed-leaf tobacco; and eighty-four per cent. of the whole product of that class was grown north of the same line. The amount of seed-leaf grown in the United States reached nearly twenty per cent. of the entire product.

Railway Accidents in the United States.

The following statistics of accidents on railways for 15 years past (compiled by the *Railroad Gazette*, N. Y.) are a record of accidents to trains only—not of all railway accidents. The larger number killed or injured on railways are those crossing or walking on the tracks, or falling from trains in motion, and without any accident to trains themselves. But these latter are not reported.

NOTE.—No comprehensive figures of the business of the railways of the United States are attainable prior to the above. And even these tables are the fruit of private enterprise, in compiling from the official annual reports of each road the results of the traffic as shown above, and including for the year 1887, the operations of companies running 136,986 miles of railway. No department of the Federal Government has been invested with authority to require returns of railway operations, except from the transcontinental lines chartered or endowed by Congress, but there are State officers charged with such duties in a majority of the States.

SUMMARY STATISTICS OF THE UNITED STATES RAILWAYS IN 1888.—AVERAGES.

For each 100 miles of railroad operated in the United States there are 20.83 locomotives; 15.88 passenger cars; 5.05 baggage, mail, and express cars; and 700 freight cars of all kinds.

The capital stock aggregates to each mile of completed road, \$28,821.

Bonded debt to each mile of completed road, \$28,230.

Total cost of construction and equipment each mile, \$52,699.

Gross earnings per mile of road in operation, \$6,861.

Net earnings per mile of road in operation, \$2,444.

Interest paid on bonds per mile of completed road, \$1,461.37.

Dividends paid on stock per mile of completed road, \$640.00.

Ratio of interest paid to total funded debt, 4.71 per cent.

Ratio of dividends to aggregate capital stock, 2.18 per cent.

Average fare per mile, 2.27 cents.

Average freight charge per ton, 1.06 cents per mile.

Total number of passengers transported in 1887, 428,225,513.

Total freight transported on all railroads in 1887, 552,074,752 tons.

STATE RAILWAY COMMISSIONS.

Railway Commissions invested with greater or less powers have been created by law in twenty-seven States of the Union up to 1889, leaving eleven States only unprovided with such officers.

The States having Railroad Commissioners are as follows, with the number constituting the Commission in each:

Alabama, 3; Arkansas, 3; California, 3; Colorado, 1; Connecticut, 3; Georgia, 3; Illinois, 3; Iowa, 3; Kansas, 3; Kentucky, 3; Maine, 3; Massachusetts, 3; Michigan, 1; Minnesota, 3; Mississippi, 3; Missouri, 3; Nebraska, 3; New Hampshire, 3; New York, 3; Ohio, 1; Oregon, 3; Rhode Island, 1; South Carolina, 3; Texas, 1; Vermont, 1; Virginia, 1; and Wisconsin, 1.

In some of these States the commissioners are merely examining and reporting officers; in others the commissioners have purely advisory powers, the legislatures retaining the sole power of regulation of railways by statute; in others still, the commissions are invested with power to fix rates of freight and fares. The States in which railway commissioners have power to fix rates are nine in number, viz., California, Georgia, Illinois, Kansas, Maine, Mississippi, Missouri, New Hampshire, and South Carolina.

The general supervision of the railways, with power to enforce existing laws by due process, and the requirement of formal reports to the legislature, constitute the functions more generally vested in the railway commissions of the States. In several States (as in Arkansas and Nebraska) three of the State officers are made railroad commissioners *ex officio*. In Tennessee alone the railway companies have successfully resisted in the U. S. Courts revision of their tariffs of charges by the railway commissioners, and the commission itself (established in 1883) has been abolished by the legislature.

* Other estimates make the coal-fields of the United States, reckoning the Permian and tertiary coals, to embrace an area of over 600,000 square miles. But all estimates of their extent are as yet conjectural, and a very large portion of their actual area contains no workable coal.

The greatly increased mileage since 1880 is principally due to the fact that in 1881 the Western Union Telegraph Company absorbed by purchase all the lines of the American Union and the Atlantic and Pacific Telegraph Company, the former having previously in operation over 12,000 miles of line, and the latter 8,706 miles. Capital stock of the Western Union, \$86,200,000.

The Western Union has exclusive contracts with several International Cable Companies, operating 8 Atlantic Cables, and guarantees 5 per cent. annual dividends on the stock of the American Cable Company; amount, \$14,000,000.

Besides the above, there are many new lines of Telegraph, which have complied with the United States Telegraph Act of 1866, and are operating wires with or without connection with Railway Companies.

THE MUTUAL UNION TELEGRAPH COMPANY, of the United States, established in 1881, has about 8,000 miles of line, 60,000 miles of wire, 1,200 offices, and has extended its lines North and South, operating already from Boston to Chicago, St. Louis, Washington, etc. Capital stock, \$2,500,000. This line is now leased and operated by the Western Union Telegraph Company.

THE BALTIMORE AND OHIO RAILROAD TELEGRAPH, having lines coextensive with its railway system and branches, besides many newly extended wires south and west, constituting 6,711 miles of line and 54,087 miles of wire, was purchased for \$5,000,000 in 1887 by the Western Union Company, which now owns and operates it.

THE BANKERS' AND MERCHANTS' TELEGRAPH COMPANY, New York, organized March 23, 1881, has about 4,000 miles of line, 28,300 miles of wire, and is in operation to many leading points. Capital authorized, \$3,000,000. Debt about \$7,500,000, as stated in August, 1884. Sold in foreclosure, July 31, 1885, and now operated by the United Lines of Telegraph.

THE AMERICAN RAPID TELEGRAPH COMPANY, New York to Boston, Philadelphia, Baltimore, Washington, Buffalo, etc., with capital stock of \$4,000,000. Has been leased by the Western Union Company.

THE POSTAL TELEGRAPH AND CABLE COMPANY, of New York, organized June 21, 1881, has about 1,500 miles of line, and 4,500 miles of wire in operation, from New York to Chicago, etc., and owns what are claimed to be very valuable patents in improved wires and telegraphy. Authorized capital stock, \$21,000,000, of which about \$7,000,000 has been issued. Now operated by the United Lines of Telegraph.

The aggregate mileage of Telegraph Lines in the United States open for public business exceeds 190,000 miles, besides Railway, Government, private, and telephonic lines, length not ascertainable.

TELEPHONES.

THE AMERICAN BELL TELEPHONE COMPANY (Boston) had in use by its licensees, January 1, 1888, 380,277 Telephones, and 743 Telephone Exchanges in various cities of the United States. The aggregate length of Telephone wires operated by these was 181,896 miles. Capital stock, \$9,802,100. Gross earnings year ending Jan. 1, 1888, \$3,453,028; net earnings, \$2,210,597. Dividends paid in 1887 16 per cent.

The aggregate number of Telephones in use in all the cities of the country, including those of competing companies, is much greater than the above.

The extent in mileage of telegraph wires put up for Telephone use in the United States is estimated at 140,000 miles.

THE BELL TELEPHONE COMPANY of Canada has in operation over 5,000 telephones in about 100 cities or towns of the Dominion. Capital, \$1,000,000.

NOTE.—In a few of the Territories, a marked change is observable in the number of Illiterates as compared with the number reported in 1870. With the exception of New Mexico, where the proportion of Illiterates has been considerably decreased by the establishment of common schools, this result is due to changes in the population, and chiefly to the withdrawal of Chinese laborers.

The Climates of the United States.

We give below a table prepared by selection from the voluminous records of the recent work on American temperature, showing the mean annual temperature of the atmosphere at a given point in each of the forty-nine States and Territories of the Union. The place is selected as either the capital or some leading city or town where observations have been most continuously kept:

2. Criminals.

NOTE.—These statistics are not in most cases based upon a census of illiteracy, which few nations have provided for in systematic form. They are to be regarded rather as an attempt to approximate the proportions ignorant of the arts of reading and writing, from such data as exist concerning soldiers, the signing of marriage registers, etc., than as exact statistics of illiteracy

a Product less exports.

Notes.—(1) The production of domestic liquors and wines for 1840, 1850, and 1860 was derived from the United States Census. (2) The consump-
tion of imported liquors and wines for 1840, 1850, and 1860 is the net imports. (3) The production of domestic wines, from 1870 to 1885, are estimates
by the Department of Agriculture, etc. (4) The consumption of domestic spirituous and malt liquors, from 1870 to 1886, was obtained from the re-
ports of the Commissioner of Internal Revenue, and for prior years from the United States Census. (5) The consumption of imported liquors and
wines, from 1870 to 1885, was taken from the official returns made to the Bureau of Statistics by collectors of customs. (6) In computing wines in
bottles, 5 so-called quart bottles are reckoned to the gallon.

The reader will note that the consumption per capita is somewhat misleading so far as distilled spirits are concerned, making no account of
alcohol, etc., employed in the arts, which forms a considerable portion of the total consumed.

OUR PUBLIC LAND SYSTEM.

THE public lands of the United States which are still undisposed of and open to settlement lie in nineteen States and eight Territories. In each case, except Ohio, Indiana, Illinois, the Indian Territory and Alaska, land offices are established, in charge of an officer known as Register of the Land Office, where the records of all surveyed lands are kept, and all applications concerning lands in each district are filed and inquiries answered. The public lands are divided into two great classes. The one class have a dollar and a quarter an acre designated as the minimum price and the other two dollars and a half an acre, the latter being the alternate sections, reserved by the United States in land grants to railroads, etc. Titles to these lands may be acquired by private entry or location under the homestead, preemption and timber-culture laws; or, as to some classes, by purchase for cash, in the case of lands which may be purchased at private sale, or such as have not been reserved under any law. Such tracts are sold on application to the Land Register, who issues a certificate of purchase, the receiver giving a receipt for the money paid, subject to the issue of a patent, or complete title, if the proceedings are found regular, by the Commissioner of the General Land Office, at Washington.

Entries under land warrants (given mostly for military services under acts of Congress), have fallen off very largely by the absorption of such warrants, there having been no military bounty land warrants provided for on account of services in the late war.

Entries under the preemption law are restricted to heads of families, or citizens over twenty-one, who may settle upon any quarter section (or 160 acres), and have the right of prior claim to purchase on complying with certain regulations.

The homestead laws give the right to one hundred and sixty acres of a dollar-and-a-quarter lands, or to eighty acres of two-dollar-and-a-half lands, to any citizen or applicant for citizenship over twenty-one who will actually settle upon and cultivate the land. This privilege extends only to the surveyed lands, and the title is perfected by the issue of a patent after five years of actual settlement. The only charges in the case of homestead entries are fees and commissions, varying from a minimum of \$7 to a maximum of \$34 for the whole tract entered, according to the size, value or place of record.

Another large class of free entries of public lands is that provided for under the timber-culture acts of 1873-78. The purpose of these laws is to promote the growth of forest trees on the public lands. They give the right to any settler who has cultivated for two years as much as five acres in trees to an eighty-acre homestead, or, if ten acres, to a homestead of one hundred and sixty acres, and a free patent for his land is given him at the end of eight years instead of five. The limitation of the homestead laws to one hundred and sixty acres for each settler is extended in the case of timber-culture so as to grant as many quarter sections of one hundred and sixty acres each as have been improved by the culture for ten years of forty acres of timber thereon, but the quarter sections must not lie immediately contiguous. The fees and commissions in timber-culture entries vary from \$13 to \$18 for the tract.

* This estimate is of a very general nature, and affords no index to the disposable volume of land remaining, nor to the amount available for agricultural purposes. It includes Indian and other public reservations, unsurveyed private land claims, the sixteenth and thirty-sixth sections reserved for common schools, unsurveyed lands embraced in railroad, swamp land, and other grants, the great mountain areas, the areas of unsurveyed rivers and lakes, and large areas wholly unproductive and unavailable for ordinary purposes. The volume of land in the unsurveyed portion of the public domain suitable for homes and subject to settlement under the laws of the United States is of comparatively small proportions.

THE COPYRIGHT LAW OF THE UNITED STATES.

EVERY applicant for a copyright must state distinctly the name and residence of the claimant, and whether right is claimed as author, designer, or proprietor. No affidavit or formal application is required.

A printed copy of the title of the book, map, chart, dramatic or musical composition, engraving, cut, print, or photograph, or a description of the painting, drawing, chromo, statue, statuary, or model or design for a work of the fine arts, for which copyright is desired, must be sent by mail or otherwise, prepaid, addressed, "LIBRARIAN OF CONGRESS, WASHINGTON, D. C." This must be done before publication of the book or other article.

A fee of 50 cents, for recording the title of each book or other article, must be inclosed with the title as above, and 50 cents in addition (or one dollar in all) for each certificate of copyright under seal of the Librarian of Congress, which will be transmitted by early mail.

Within ten days after publication of each book or other article, two complete copies must be sent prepaid, or under free labels, furnished by the Librarian, to perfect the copyright, with the address, "LIBRARIAN OF CONGRESS, WASHINGTON, D. C."

Without the deposit of copies above required the copyright is void, and a penalty of \$25 is incurred.

No copyright is valid unless notice is given by inserting in every copy published, "Entered according to act of Congress, in the year —, by —, in the office of the Librarian of Congress, at Washington," or, at the option of the person entering the copyright, the words: "Copyright, 18—, by —."

The law imposes a penalty of \$100 upon any person who has not obtained copyright who shall insert the notice "Entered according to act of Congress," or "Copyright," or words of the same import, in or upon any book or other article.

Each copyright secures the exclusive right of publishing the book or article copyrighted for the term of twenty-eight years. Six months before the end of that time, the author or designer, or his widow or children, may secure a renewal for the further term of fourteen years, making forty-two years in all.

Any copyright is assignable in law by any instrument of writing, but such assignment must be recorded in the office of the Librarian of Congress within sixty days from its date. The fee for this record and certificate is one dollar.

A copy of the record (or duplicate certificate) of any copyright entry will be furnished, under seal, at the rate of fifty cents.

Copyrights cannot be granted upon Trade-marks, nor upon Labels intended to be used with any article of manufacture. If protection for such prints or labels is desired, application must be made to the Patent Office, where they are registered at a fee of \$6 for labels and \$25 for trade-marks.

General expenditures not embraced in statement by States, \$2,364,671.

General receipts not embraced in statement by States, \$952,837.

Excess of expenditures over receipts, of fiscal year 1888, \$3,100,181.

NOTE.—This table, as remarked by the 6th Auditor, presents inequalities which cannot be avoided in any attempted tabulation by States. Thus, some States are charged with a greater sum for mail transportation than belongs to the State service, as the through mails are charged to them, while the postal revenue which pays for this service is collected and credited in other States.

This exhibit of the total revenues of the government (from which the column of cents is omitted for greater condensation) omits one item of receipts, under the head of "Dividends," which represents the revenue derived from the Bank of the United States, between the years 1792 and 1802, and from 1817 to 1836 inclusive. The aggregate of these dividend receipts was \$9,720,136. The items of "Interest" and "Premiums" on government loans and sales of gold coin are also omitted, as constituting no part of net ordinary receipts.

Receipts of the United States from March 4, 1789, to June 30, 1888.— Continued.

The import values are invoice prices in gold at place of shipment, and the export values are also in specie. From 1862 to 1878, representing the period of suspension of specie payments, an additional column on the right exhibits the currency value of domestic exports, added to the specie of domestic production exported.

NOTE.—The rule observed in the above table, of including only specific articles, which pay as much as \$100,000 revenue into the Treasury, of course omits a great many minor articles of commerce, yielding little revenue. To print the whole in detail would occupy too great space, but the scheme followed sums up the aggregate of each great class of imported commodities, with the duties collected, and the average percentage of duties thereon.

Brief History of the Standard Silver Dollar.

Authorized to be coined, Act of April 2, 1792. Weight, 416 grains, standard silver; fine-
ness, 892.4; equivalent to 371¼ grains of fine silver, with 44¾ grains alloy of pure copper.
Weight changed, Act of January 13, 1837, to 412¼ grains, and fineness changed
to 900, preserving the same amount of pure silver = 371¼ grains, with ½ alloy.
Coinage discontinued, Act of February 12, 1873.
Total amount coined, from 1792 to 1873, \$8,045,838.
Coinage revived, two million dollars per month required to be coined, and issue
made legal tender for all debts, public and private, Act of February 28, 1878.
Total amount coined, February 28, 1878, to October 1, 1888, \$306,542,890.

LOWEST AND HIGHEST PRICES OF COMMODITIES FOR FIFTY-SIX YEARS—1825-1888.

(Compiled from the Reports of the Secretary of the Treasury for 1863 and 1873, the Commercial and Financial Chronicle, Reports of the N. Y. Chamber of Commerce, and the N. Y. Shipping List and Price Current.)

NOTE.—In the American Almanac and Treasury of Facts for 1873, pp. 278-9, appeared a table of prices compiled on the basis of the average price of each article in New York, the 1st of January of each year. Such a table, however useful, fails to give the data which are important in forming a judgment of the whole range of prices for each year. The following table, carefully compiled from the sources indicated, takes the prices of the twelve months in each year, selecting the highest and lowest quotation for each article. It is to be understood, where no mention of quality is made, that the price quoted is for the cheapest grade of each commodity.

The prices are those of the New York market.

LOWEST AND HIGHEST PRICES OF COMMODITIES FOR FIFTY-SEVEN YEARS--1825-1888.

These tables of prices have been compiled upon the basis of selecting the leading articles entering into general consumption, whether as semi-luxuries or the necessities of life. The prices quoted being those of the New York market, still wider variations would in some cases have been exhibited if other markets, near the centres of production of some leading staples, had been collated with these. The tables exhibit the violent fluctuations of the civil war period in the United States--1861-65--and the years of expansion immediately succeeding, in contrast with the general decline of the past few years, which has not yet reached, however, save in a few articles, the minimum prices which prevailed before the war,

LOWEST AND HIGHEST PRICES OF COMMODITIES FOR FIFTY-SEVEN YEARS—1825-1888.

Compiled from the Reports of the Secretary of the Treasury for 1863 and 1873, Reports of the N. Y. Chamber of Commerce, the N. Y. Shipping List and Price-Current, and the N. Y. Produce Exchange Reports.

NOTE.—In the American Almanac and Treasury of Facts for 1878, pp. 278-9, appeared a table of prices compiled on the basis of the average price of each article in New York, the 1st of January of each year. Such a table, however useful, fails to give the data which are important in forming a judgment of the whole range of prices for each year. The following table, carefully compiled from the sources indicated, takes the prices of the twelve months in each year, selecting the highest and lowest quotation for each article. It is to be understood, where no mention of quality is made, that the price quoted is for the cheapest grade of each commodity.

¹ California holds in trust for her School and University funds \$2,690,000 of her bonded debt, on which interest only is payable, reducing the debt to zero.

² Delaware has no State tax on property, and no State valuation of taxable property. The State holds interest-paying securities of over one million, and is really out of debt.

³ All of Iowa's debt is invested in the School Fund, the interest only being payable.

⁴ Kansas holds \$607,925 of its bonds in School Fund.

⁵ Kentucky had \$922,676 in Sinking Fund and is practically out of debt.

⁶ The State of Maryland held \$5,239,302 in interest-paying securities of corporations, besides \$27,723,287 in unproductive securities.

⁷ Massachusetts held \$23,184,033 in Sinking Fund.

⁸ Of Minnesota's debt, \$2,849,000 is held as permanent investment by school funds.

⁹ Mississippi's debt was due the School Fund to the amount of \$2,404,566, on which interest only is payable, leaving net debt, less cash in treasury, \$331,725.

¹⁰ New York held in Sinking Fund, October 1, 1888, \$4,236,129.

¹¹ Pennsylvania held \$2,077,074 in Sinking Fund; also in stocks of incorporated companies, interest-paying, \$7,300,000.

¹² Of the debt of Texas, \$2,991,900 is held by special State funds, leaving the net debt \$1,245,830.

* In these States the Governor and most State officers are elected quadrennially, and the Legislature (or the members of the Assembly) every two years

° In Louisiana, the Legislature and State officers are elected quadrennially; members of Congress biennially.

° The Ohio election, for State Ticket, was changed in 1885 by constitutional amendment, from October to November.

* Wisconsin has changed the sessions of the Legislature, and the times of election from annual to biennial.

By act of Congress, March 1, 1792, amended Jan. 23, 1845, a uniform day of election for Electors of President and Vice-President, is fixed for all the States—being the Tuesday next after the first Monday in November, every fourth year after a President has been elected.

By act of March 3, 1875, elections of Representatives in Congress are required to be held on the Tuesday next after the first Monday in November, every second year, in 1876 and following years. Subsequent special Acts enable States whose Constitutions fix a different date to elect earlier, until they amend their Constitutions.

¹ In Ohio and a few other States, where the Legislative sessions are biennial, the Legislature holds "Adjourned Sessions," practically amounting to annual meetings.

² The Rhode Island Legislature is required to meet annually the last Tuesday in May, at Newport, and an adjourned session to be holden annually at Providence.

³ Unless extended by special vote.

¹ Including merchandise, specie, and bullion.

² Including New South Wales, New Zealand, Queensland, South Australia, Tasmania, Victoria, and Western Australia.

³ Spain being wholly unable to meet the interest on its debt, it was "converted" in 1881-2 from an aggregate of \$2,560,000,000 into new securities to the amount of \$1,290,000,000 at 4 per cent.

⁴ The debts of Sweden and Switzerland are wholly offset by the value of the State property.

⁵ The Turkish Government, by arrangement with a committee of bondholders, "scaled" its public debt in 1881, from \$1,264,009,425 to \$532,186,170, pledging its revenues for payment.

⁶ Venezuela's foreign debt, which had grown to over \$54,000,000 in 1878, when interest payments were resumed, was "consolidated" into new 4 per cent bonds in 1881.

FOREIGN COUNTRIES.

Note.—For the rulers or heads of principal nations, see page 111.

Argentine Republic.

This country has an area as great as all Central and Western Europe combined (about 1,619,500 sq. miles), and a population of 1,768,681 by census of 1869, now estimated at 2,800,000. It abounds in remarkably fertile plains, called pampas, with rich alluvial soil four or five feet thick, formed by decay of luxurious vegetation.

It consists of 14 provinces: the province of Buenos Ayres is the most populous, having over half a million population, with a capital city—Buenos Ayres—of 200,000, estimated for 1878. The vast extent of Indian country is very sparsely populated. The population of Buenos Ayres and the riverine province is largely European, and immigration has increased enormously of late years, attracted by the fertility of the soil and the prosperity and free institutions of the Republic. By the last census there were 212,000 people of foreign birth, occupying 2,000,000 acres of land, in the province of Buenos Ayres alone, and owning 85 million sheep, besides multitudes of horned cattle, buildings, etc., acquired in a few years by men who, on arrival, did not own a dollar.

Eminently a pastoral country, with about 18 million horned cattle, and 140 million sheep, the exports are largely of wool, hides, and tallow. The premium on gold varied from 20 to 28 per cent. in 1874. The exports in 1887 were \$89,418,641 and the imports \$121,123,120. 12 lines of steamers run to Europe, the passage occupying 29 days. The republic has about 4,150 miles of railway and 12,619 miles of telegraph, besides an Atlantic cable communicating with London.

The revenue for 1888 was \$51,172,645, derived almost wholly from import and export duties. The expenditure in 1888 was \$51,151,887, and the total national debt, \$145,829,650.

The government is a Federal Republic, modelled on the Constitution of the United States, except that the ministry is responsible to Congress, an adverse vote in the Senate and House leading to the formation of a new cabinet. The laws are the same for all, native or foreign; immigrants are free to naturalize themselves as Argentines or to maintain their foreign nationality.

Austria.

Called, since 1867, the Austro-Hungarian Monarchy (240,000 square miles; population in 1885, 41,056,906). comprises five countries, each bearing the name of kingdom. Its largest city and capital, Vienna, had 1,108,857 inhabitants in 1890.

The population of Austria embraces several distinct races, the most numerous being the German, numbering 9 millions, or 25 per cent. of the whole.

The various Slavonic races number about 16½ millions, or 46 per cent., Poles, Croats, Serbians, Czechs, Moravians, etc. The Magyars, or Hungarians, number 5½ millions, or 16 per cent.; the Wallachians, nearly 8 millions; the Jews, 1,100,000; the Italians 515,000; and Gypsies, 140,000.

About two-thirds of the people profess the Roman Catholic religion. Education receives great attention, and is open to all at small cost, or even gratuitously. In Austria, all children from six to twelve are bound to attend the common schools, and 76 per cent. actually do so. There are 92 gymnasia, or higher schools, and 6 universities, while Hungary has 142 gymnasia, and one university.

The majority of the people pursue agriculture. About 30 per cent. are engaged in trade or manufactures. The productive land of Austria is estimated at 89 per cent. of its area; Hungary 84 per cent. The great crop is grain, an annual yield of over 400 million bushels. For commerce, Austria is not favorably situated, being an inland country. The principal sea-port is Trieste, on the Adriatic. Total imports 1886, 265 million dollars, and exports 332 million dollars.

The legislative body, or Reichsrath, consists of a House of Lords nominated by the Emperor, consisting partly of life members and partly of hereditary nobles; and a House of Representatives, 353 members, elected by all citizens who possess a small property qualification.

Hungary has a Reichstag, consisting of a House of Magnates for high officers and peers of the kingdom, and a House of Representatives elected for three years. The sovereign (the Austro-Hungarian Emperor) is styled king in Hungary.

In the imperial finances Austria pays 70 per cent. and Hungary 30 per cent. toward the expenses of the empire. The budget of 1888 summed up: receipts, 63 million dollars; expenditures, about the same. The budget of Austria proper amounted to 249 million dollars in 1887; the expenditures to \$256,538,647. The Hungarian budget for 1888 including receipts, \$158,323,865, and expenditures, \$164,640,320. The public debt of the empire was \$1,741,035,609.

The army, on a peace footing, consisted in 1888 of 271,566 men and 18,567 officers. Military service is compulsory for ten years.

The navy in 1888 consisted of 110 vessels, 11 of which were ironclads, and a total of 311 guns.

Belgium.

Belgium is a kingdom of Western Europe; area, 11,378 square miles; population, 1885, 5,853,278; capital, Brussels, 171,751. Most of the people are Roman Catholics, there being about 16,000 Protestants and 8,000 Jews. Revenue, 1887, \$64,079,485; expenditures, \$62,880,000.

The public debt in 1888 was \$422,650,000. Imports in 1886, \$258,650,000 exports, \$28,841,340. Army, peace footing, 43,734.

Railways in operation, 1887, 2,756 miles, two-thirds of which were owned and managed by the government; miles of telegraph, 1888, 4,050; post-offices, 816; letters carried, 101,498,150; postal cards, 26,539,344; journals, 97,559,000. The great interests are agriculture and manufactures, Belgium being one great workshop. Education is zealously promoted by the government, but, notwithstanding abundant primary school provisions, only 58 per cent. of the population above 7 years of age were able to read and write in 1886.

Bolivia.

Bolivia, a republic of South America, named in honor of Bolivar, (536,200 square miles; population 1878, estimated, 2,080,000, to which should be added about 245,000 wild Indians), is divided into 9 departments, each having a distinct governor. The government is popular in form, three legislative chambers being elected for four years, eight years, and for life. The president is elected for life by a majority of the collective legislature. The administration belongs wholly to the ministry, which is responsible to the Senate. Religion is free, the Roman Catholic being the prevailing form.

The public debt in 1888 was 6,500,000. The revenue was \$3,566,425 in 1887, one-fifth of which was derived from customs, about as much from Indian tribute, and half as much from the sale of guano; expenditure, \$4,477,115. Imports in 1885, \$5,950,000; exports, \$10,115,845.

Bolivia abounds in high plateaus, constituting granaries of wheat production, has much valuable timber, and the lowlands are the seat of tropical forests and swamps, with every variety of climate, and two or more zones of production. It produces coffee, cotton, sugar-canes, garden vegetables and fruits in surprising luxuriance and abundance. Western Bolivia contains the highest mountains of the two Americas, with frequent volcanoes. The great Cordillera range, reaching up into the region of eternal ice and snow, culminating in the peak of Sorata, 24,800 feet high. The silver-mines of Potosi, world-famous for richness of production, have yielded over \$1,600,000,000 since 1545. Bolivia is poorly supplied with roads, and railroads are as yet almost unknown, great natural difficulties being presented to their construction.

Brazil.

Brazil, the only kingdom in America, (area, 3,287,964 square miles; population, 1883, 12,833,875,) is the largest of the South American countries. First discovered by Spaniard in 1500, the country early fell into Portuguese possession, afterwards passing under the Spanish rule, but reverting to Portugal in 1640.

The legislative power is vested in a Senate of 58 members elected for life, and a Chamber of Deputies, 122 members, chosen for four years by direct suffrage.

The executive power is vested in the emperor, and his ministers and secretaries of state. For administrative purposes, the Brazilian empire is divided into twenty provinces, comprising 642 municipalities, each having a council chosen directly by citizens.

The public debt of Brazil is about \$565,035,000, of which \$85,000,000 consists of paper-money issues. The revenue for 1888 was \$70,848,960, more than one-half of which was customs duties, and one-sixth from export duties, the taxes in both these forms on commodities being very heavy. The expenditure in 1888 was \$79,580,440.

The army consists of 15,040 men, raised to 30,000 on a war footing.

The naval force embraces 98 steam-vessels, with 222 guns, and 5,704 seamen.

Free public schools supported by the state exist throughout the empire, and in some of the provinces instruction is compulsory.

Brazil has about 500 newspapers, of which six dailies are published at the capital, Rio de Janeiro.

The Roman Catholic religion is established, other forms being tolerated, though they may only be practised privately, and dissenters enjoy civil rights, even that of election to the General Assembly.

Brazilian commerce is flourishing, and there are 23 lines of steam-vessels, receiving annual subsidy from the state to the amount of \$1,000,000; besides this, the North American steamship line, running between Brazil and New York, enjoyed a Brazilian subsidy of \$100,000 annually. The imports in 1887 aggregated \$103,691,240 and the exports, chiefly of coffee, hides, and sugar, \$125,143,260. By a decree of 1867, the great river Amazon was opened to the trading ships of all nations. In 1874, a submarine telegraph cable was completed from Europe. The roads of Brazil are wretched, but railways have been constructed to the number of over twenty, and are being rapidly extended by the state, as well as by private enterprise, 5,379 miles of railway being open in 1888.

THE DOMINION OF CANADA.

[Compiled from the Sessional Papers of the Dominion of Canada for 1888, and other Official Sources.]

The Dominion of Canada forms (since 1867) a confederate government, embracing the British North American Provinces of Ontario, Quebec, New Brunswick, Nova Scotia, Manitoba, British Columbia, Northwest Territory, Vancouver's Island, and Prince Edward Island. It has a representative Parliament, meeting annually at Ottawa, the capital. The members of the Senate, 78 in number, are nominated for life by the Crown of Great Britain. The House of Commons, with 215 members, is elected by the people for five years, the right of suffrage being subject to a property qualification. The Governor-General, appointed in 1888, is Lord Stanley of Preston, salary \$50,000. The funded and unfunded debt in 1888 was \$278,186,626, drawing interest at an average of 4 per cent., having increased to this amount from \$93,000,000 in 1867. Against this was sinking fund, etc., with cash on hand, \$45,878,715. The revenue for fiscal year ending June 30, 1887, was \$35,754,998; derived from the following principal sources: Customs, \$22,878,801; excise, \$6,308,201; public works, including railways and canals, \$3,270,782; post-office, \$2,020,623. The expenditure for 1887 was \$35,658,161. The chief items of export were, 1887:

Agricultural products.....	\$23,719,148	Fisheries (\$3,500,000 to the U. S.)..	\$6,977,674	
Animals, and produce of.....	25,072,539	Manufactured articles.....	3,507,614	
Wood, timber, lumber, etc.....	22,248,483	Products of the mines.....	4,110,608	

Of the imports, 44 millions came from Great Britain, 45 millions from the United States, and 16 millions from other countries. Leading imports were: Cotton manufactures, 5 millions; flour and grain, 2 millions; iron and steel manufactures, 12 millions; and woolen manufactures, 12 millions.

Of the exports, \$44,578,846 went to Great Britain, 88 millions to the United States, and 8 millions to all other countries. The Canadian lumber trade is of great extent and value, and about half of its aggregate exports go to Great Britain, with about 10 millions in value to the United States.

The merchant shipping of the Dominion, January 1, 1887, numbered 7,178 vessels, measuring 1,130,247 tons, and is steadily increasing. Value of merchant shipping, \$26,955,680. The canals of Canada are extensive and profitable, and are managed by the Government.

The Canadian banks held July 1, 1886, \$112,991,764 in deposits, with a note-issue of \$32,368,993; coin, \$6,500,000; and bills discounted, \$159,000,000. The Government savings-banks held in 1886, \$26,130,150 in deposits, and the post-office savings-banks, \$23,342,842 in deposits.

The total money value of the fisheries within the Dominion of Canada has been as follows for the past fifteen years:

1871.....	\$7,573,199 85	1876.....	\$11,012,302 39	1882.....	\$16,086,672 00

The census of the Dominion in 1881 showed a population of 4,324,810, against 3,686,596 in 1871, a gain of 18 per cent. The Indian population of Canada, as reported by the Superintendent of Indian Affairs, in 1885, was 129,525.

The average of duty on all imported commodities subject to duty was 21.2 per cent. in 1887. Expense of collecting customs revenue, 3.64 per cent.

The census of 1881 returned the amount of capital invested in manufacturing industries at \$165,302,623. The average wages of Canadian mechanics was \$515.00 yearly, in 1885. Miles of railway in operation, 1887, 12,332, of which 1,185 miles are owned by the Government; miles under construction, 660. Receipts, gross earnings, 1887, \$88,841,609; net earnings, \$11,216,926. Total railway capital, \$718,998,373. The Government railways were run at a loss of \$190,637 in 1886.

Subsidies granted by Dominion Government to railways up to 1887, \$150,702,659.

Commerce of Canada for Twenty Years—1868-1887.

Chili.

Chili, a republic of South America, area 124,064 square miles, population, 1885, 2,527,320 to which should be added by official estimate, about 50,000 Indians, is a mountainous country subject to frequent earthquakes. It has almost every variety of climate, its long narrow territory extending from the hot deserts near the equator to the cold and wet region within twelve degrees of the Antarctic Circle. One-quarter of the country is near the level of the sea, while the great Andes range of mountains rise far above the line of perpetual snow, their mean elevation being 11,830 feet, and the highest peak (Aconcagua) 22,427 feet.

Chili, originally a Spanish settlement, became independent in 1810-'17. By the constitution of 1833 the Legislative power is in a National Congress composed of 37 members, elected for six years, and a Chamber of Deputies, 109 members, for three years. Suffrage is universal to citizens able to read and write and paying a small annual tax.

The executive power resides in a President elected for five years, a council of State, and five cabinet ministers, having salaries of \$6,000 each.

The national debt in 1888 amounted to \$80,568,887, mostly contracted in England for the construction of railways. The revenue for 1887 was \$41,879,958, one-half derived from customs and monopolies, and the expenditure \$35,745,770. The commerce of Chili is considerable, the exports being \$46,740,268 in 1886, and the imports \$40,170,168, nearly one-half the commerce being with Great Britain.

Agriculture flourishes, although about 82 per cent of the entire surface is desert, pasture, or forests, with only 18 per cent arable land. Wheat is the most important product, the crop averaging ten million bushels, two-thirds of which is exported.

Chili is rich in gold, silver, and especially in copper.

The army, reduced in 1876 to 3,500 men, was largely increased in 1879 on account of the Peruvian war, and numbered, in 1888, 6,570 men.

The navy consists of about 20 steam vessels, manned by 1,573 men.

Education is largely aided by government, which supports 810 schools through the country, besides lyceums and the University of Chili, an invaluable government institution, with 700 students, 37 professors, and free instruction.

The Roman Catholic religion is recognized by the constitution, but the public profession of other forms is tolerated.

China.

China, an immense empire in Asia, area 4,560,107 square miles, population 382,429,572 (1887), has of late years opened diplomatic and commercial intercourse with other nations. It includes Tibet, Mongolia, and Manchuria, besides China proper; the country abounds in numerous rivers, forming the chief highways of the empire. The government is a patriarchal despotism, the Emperor being an autocrat, whose sway is limited only by the sacred right of rebellion. Its vast and productive territory is larger than that of any nation except Russia, and its civilization, the most ancient in the world, has peculiarities unknown to the civilizations of Europe or America. The exclusiveness which long made China a sealed book is slowly giving way, and the empire now sends its ministers to the United States, England, France, Germany, Russia, Spain, the West Indies, and Japan; but the Chinese government still refuses to open the empire to railroads and telegraphs, and destroyed in 1877 the first and only railway laid in the empire: and only 14 of its numerous ports are open to foreign trade. The imports in 1887 were \$122,153,500 and the exports \$103,033,640, about one-third of the commerce is with Great Britain; silk and tea make up three-fourths of the exports, while opium and cotton goods constitute two-thirds of the imports. No certain information regarding Chinese finances exists, but the revenues were estimated in 1885 at \$82,488,690; the public debt is about \$38,500,000, being wholly domestic, except one foreign loan of \$7,800,000 at 8 per cent. recently contracted, and guaranteed by the customs receipts.

The army of China has 800,000 men organized after the European custom, while on paper the military force is set down 800,000 Chinese and 271,000 Manchoes. The navy embraces 124 vessels.

Colombia.

Colombia (the Republic of) is a centralised government in South America, including a large part of what was called New Granada; area 320,835 square miles; population, 1870, 3,408,532, besides about 100,000 wild Indians. Its present political organization dates from 1886. The largest city is Bogota, the capital, with 50,000 inhabitants, and Panama has about 20,000.

The legislative power resides in a Senate of 27 members, and a Representative Chamber of 61, elected by general suffrage. The executive power is exercised by a President chosen for two years by the people of the different States, and by four ministers. The revenue is very small, amounting in 1887 to only \$10,185,640, two-thirds of which was from customs. The expenditure was \$10,293,820 in 1887. The public debt amounted to \$29,163,480 in 1887; imports in 1887 to \$13,520,840; exports, \$7,968,000.

Coffee, cotton, tobacco, and cinchona bark form a large part of the exports, and agriculture is the leading industry. Only 178 miles of railways are in operation, the Panama line across the Isthmus, 46 miles, being the principal. Telegraphs, 2,820 miles. Letters carried by post-office, 1,200,000.

Colomola has no navy, and the army in time of peace musters only 6,500 men. Education has been recently much improved, the law of 1870 transferring it from the hands of the clergy to the State, and requiring compulsory instruction, the general government subsidizing the States to maintain schools. Religious freedom prevails, there being no State church, though the predominant religion is Roman Catholic.

Costa Rica.

Costa Rica, the most southern republic of Central America, area 21,495 square miles, population in 1885, 213,785, mostly of Spanish descent, with very slight foreign elements. It is divided into six provinces, the government being vested in a President elected for 4 years, two Vice-Presidents and four ministers. The legislative power is in a Congress of Deputies chosen for 4 years.

The revenue for fiscal year 1888, \$3,306,742, one-third of which is derived from the monopoly of tobacco and brandy by the government, the rest from customs and various taxes. The expenditure was \$3,288,944, and the public debt \$10,611,824. The debt of Costa Rica was "scaled" in 1885, reducing \$24,054,520 to a new 5 per cent. obligation of the preceding amount. The exports of 1887 were \$6,028,562; the imports were \$5,416,225, chiefly manufactures from England.

There is no standing army except 900 soldiers of the militia, which comprises 18,570 men, or all between the age of 15 and 30. The State Religion is Roman Catholic, but full religious liberty is guaranteed by the Constitution. The soil is extremely fertile; there are vast forests of mahogany, ebony, Brazil-wood, and India-rubber trees, and the climate fosters almost all the fruits of the tropic and temperate zones, about 1,100 square miles being under cultivation. Railways 170 miles; telegraphs, 451 miles.

Cuba.

Cuba, a colony of Spain, in the West Indies, having 72,000 square miles, population, 1880, 1,521,684, half of whom are blacks, and enfranchised slaves. The island is governed by a Captain General, appointed by the Spanish crown. Its great staple is sugar, of which 450,000 to 600,000 tons are annually exported, two-thirds of it to the United States, besides 4,000,000 to 5,000,000 gallons of molasses.

Denmark.

Denmark, (area 14,553 square miles; population 1880, 1,969,089), is a constitutional kingdom, occupying an almost insular position between the North Sea and the Baltic. The climate is like that of Scotland in the same latitude, the mean temperature of the year being 47° at Copenhagen. The constitutional charter of 1849, vests the legislative power in the Rigsdag, consisting of a Folkething, 102 members, and a Landsting, 66 members (1850 charter amended in 1866). The Folkething are elected for three years by universal suffrage, and the Landsting for eight years by electoral districts, except 12 members who are nominated for life by the King. King, Christian IX.

The budget for 1887, including receipts, \$15,421,150, of which no less than \$9,800,000 from indirect taxes and \$2,300,000 from direct taxes. The expenditure was \$15,186,420, one-fourth of which was on account of the national debt, which amounted in 1887 to \$54,369,825.

The army (recruited by conscription) embraces 59,562 men, besides a reserve of 15,258. The navy in 1886 included 37 steam vessels with 230 guns, and 29 sail vessels.

The commerce of Denmark in 1886 comprised \$45,781,508 imports, and \$56,318,504 exports, the exports chiefly grain and provisions.

There are 1,604 miles of railway, two-thirds of which are operated by the State. The government telegraph embraces 2,502 miles, which transmitted a total of 1,125,000 dispatches in 1883. The postal system, 1884, transmitted 29,572,652 letters and 86,990,037 newspapers.

The established church of Denmark is the Lutheran—Protestant—Roman Catholics are however long since tolerated in Scandinavia.

By the census of 1870 there were, Lutherans, 1,777,000; Jews, 4,300; Baptists, 3,200; Mormons, 2,200; Roman Catholics, 1,800.

Education is highly developed by the compulsory system, and almost all the lower classes can read and write.

Ecuador.

Ecuador, a South American republic, traversed by the equator, from which it takes its name, area 248,312 square miles, population in 1885, 1,004,651, besides about 200,000 Indians; capital, Quito, has about 80,000 people; Guayaquil, the principal seaport, 26,000. Quito is the loftiest inhabited city, 9500 feet above the sea. The country is traversed by the two vast mountain ranges of the Cordilleras, reaching to a height of 18,000 feet, full of noble volcanic summits, and divided by magnificent valleys. Cotopaxi and Chimborazo are capped with perpetual snow.

The government is vested in a President, chosen by 900 electors appointed by popular vote, the Vice-President, who is Minister of the Interior, and three other cabinet officers. The Congress consists of a Senate of sixteen, and a House of thirty members.

chosen by popular suffrage. The army has only 4,730 men, and the navy three small steamers. The finances, which are in a state of chronic deficit, represented in 1887 revenues (half derived from customs) amounting to \$3,448,184, expenditures, \$9,569,480. The public debt in 1888 was \$13,738,490.

Roads are almost unknown in Ecuador, being mostly mere mule tracks, impassable for several months of the year; all transportation of goods is on the backs of mules, wheeled conveyances being almost unknown. There are 75 miles of railway.

The principal article of export is cacao, amounting to \$5,539,641 in 1887, out of a total of \$10,193,645; the imports were about \$11,106,310.

The sole religion professed is the Roman Catholic, and 10 per cent of the Church revenue belonging to the State goes to the Pope as an annual offering. Education is in the hands of the clergy, with about 600 schools, one university and several colleges.

Egypt.

Egypt, a dependency of Turkey, situated in northern Africa, area 1,152,948 square miles; population in 1882, 6,817,265 by census, excluding Nubia and Soudan. Imports 1887, \$40,685,000; exports, \$54,880,000. More than half the commerce is with Great Britain. The executive power, which is absolute, is in the hands of the Khedive, a prince tributary to the Sultan. The largest city is Cairo, 349,883 inhabitants. Revenue for 1888 was estimated at \$43,016,470, and the expenditures at \$47,613,000. Public debt, \$518,625,840. Army, 4,845 men; navy, 14 vessels. Railways in 1885, 1,276 miles; telegraphs, 5,811 miles. Letters carried by post in 1887, 5,481,000; journals, 2,416,000.

France.

The Republic of France (204,080 square miles; population in 1886, 38,218,903) dates to present constitution and government from the 4th of September, 1870, when the Second Empire, under Napoleon III, came to an end. The legislative power is vested in a *Corps Legislatif*, consisting of a Senate of 300 members, 225 of whom are chosen for 9 years by the Departments and the colonies, and 75 for life by the National Assembly; and a Chamber of Deputies, now 532 members, elected by universal suffrage, one deputy to each 100,000 inhabitants. Salary of Senators and Deputies, \$1,800. Every Frenchman of 21 years has the right to vote, and there were in 1876, 9,948,079 legal voters, a ratio of one voter to every four inhabitants nearly.

The executive power is vested in a President, elected for seven years by a joint assembly of the Senate and the Chamber of Deputies; salary, \$120,000, and \$32,480 for household expenses; he has power to dissolve the Chamber of Deputies upon the advice of the Senate. The ministry, or Secretaries of State, consisting of nine members, are responsible to the Chambers for the political conduct of the government, while the President is responsible only in case of high treason.

Besides these officers, there is a Council of State presided over by the Minister of Justice, whose function it is to advise on all subjects of law and administrative regulations submitted to it, its decision being final on causes or complaints against officers of the Government.

France is divided into 87 departments, which are subdivided into 362 "arrondissements," 2865 "cantons," and about 36,000 "communes." The President of the Republic appoints a prefect or administrative officer for each department, who is head of the police, issues local decrees, superintends tax collection, and, in a word, represents the government as general agent, assisted by a council elected by the people.

Public debt is divided into funded debt, which is not subject to re-imbursement, but only to interest payment, and floating debt or deposits with the treasury, and bills of exchange called "bons du trésor." The funded debt, represented by 5, 4½ and 3 per cent. Rentes, was \$6,381,458,940.

Revenue for 1888, \$580,236,840; expenditure, \$575,265,840.

Imports in 1887 amounted to \$878,260,941, and exports the same year to \$720,137,640.

Miles of railway, January 1, 1888, 21,210. Telegraph, 51,809 miles.

The large revenues are derived chiefly from excise and stamp taxes, only the insignificant sum of \$73,000,000, or about 1 per cent. of the whole revenue, coming from customs; the land tax or "contribution foncière," is assessed on the net revenue of lands and houses; the poll-tax, the door and window tax, and the license tax bring in large sums; the income tax is 3 per cent. on income from public funds or any other dividends, besides which the stamp taxes amount to 3 or 4 per cent. on this class of property; the excise brings in the largest revenue of all, about \$200,000,000 per annum. It is levied on spirits, tobacco, salt, sugar, paper, matches, coaches, railways, bridges, receipts, etc.

The army, consisting of about 511,472 men in time of peace, and 24,494 officers, costs about \$115,000,000 per annum. Every Frenchman of 20 years owes to the country five years active service, with very slight exemptions.

The French navy has 388 vessels, 1,688 officers, and about 41,227 marines.

The Roman Catholic Church is the most powerful in France, and the sums paid to the clergy of that faith by the government amount to about \$3,900,000 a year.

Systematic provision is made for public instruction, every commune having to maintain primary schools, though education is neither gratuitous nor compulsory. In 1873 out of a population of 28,294,554 above twenty years, 7,702,362 could neither read nor write.

Italy.

Italy, a kingdom of Southern Europe; area 114,380 square miles; population 1887, 30,280,065, of whom 26,658,679 were Catholics. It is divided into 69 provinces. The government is a constitutional monarchy, with a senate of 270 members appointed for life, and a chamber of 508 deputies elected by general suffrage. Absolute freedom of the press prevails. The government supports education, which is compulsory and gratuitous, by annual subsidies of about \$3,500,000. Agriculture is the principal Italian interest, though the silk, cotton, woolen, and straw manufactures are becoming important. Italy abounds in populous cities, of which Naples, 468,172, is the largest, and Rome, the capital, has 273,268. Revenue in 1888, \$366,125,078; expenditure, \$374,534,718; public debt, \$2,246,903,485; imports, 1887, \$327,640,890; exports, \$214,940,820, of which silk made \$56,000,000. Standing army, 879,092; militia, 1,716,547; navy, 175 vessels with 869 guns; 7,816 miles of railway in 1886, and 18,955 miles of telegraph.

Japan.

Japan is an empire of Eastern Asia, ruled by a mikado, aided by a great council, and without a legislative body; area, 146,613 square miles; population, 1887, 38,507,177. Revenue, 1888, \$79,936,870, four-fifths of which was from land tax; expenditures, \$79,935,553; public debt, \$249,108,517. The army comprised 54,388 men in 1885, and the navy 37 steam vessels with 4,073 men. Imports, 1887, \$51,699,769; exports, \$52,409,223, one half of which was raw silk. Nearly one half the commerce of Japan is with Great Britain and her colonies. Railroads in operation, 579 miles; telegraphs, 5,772 miles; post-offices, 4,137, transmitting in 1885, 97,216,019 letters. The paper money of Japan is at about 30 per cent discount.

Mexico.

Mexico, a republic of North America, on the southern boundary of the United States—area, 741,778 square miles; population 1886, 10,460,636—is divided into 27 States besides two Territories, the Federal District, and the new State of the Valley, governed by a president elected for 4 years, a senate of 56 members, half renewed every 4 years, and a house of deputies of 227 members elected for 2 years. Each State has its local constitution, with elective governors and legislatures. The national language is Spanish, but many Indian dialects are spoken, and the Catholic religion predominates, though there are several religious sects. Education is being rapidly extended, there being 8,905 public schools and colleges, having 500,925 pupils. Railway communication has been greatly developed of late, there being 4,650 miles of railway in operation. The country is so mountainous that the government and the railroad companies have spent large sums of money in the construction of some of the lines. If their freight tariffs are, however, compared with those of other countries, and the commercial movement, which is yet in its cradle, is taken into consideration, it will be seen that railroads afford security to the inhabitants and a daily increasing trade. There are about 17,570 miles of telegraph, including government, private and railway lines. The chief communication is by the highways between principal cities, on which many lines of stages are constantly plying. The country is rich in agriculture and mineral wealth, vast table-lands, varying from 3000 to 5000 feet in elevation, producing every variety of grain and vegetables, while in the warmer regions oranges and other tropical fruits grow profusely. Coffee and cotton are largely cultivated. The northern States of Mexico are full of vast herds of cattle and sheep. Manufactures are becoming more developed, and commerce, though heretofore much impeded by restrictive laws, is on the increase. The imports amount to a mean annual value of \$40,285,360 and the exports \$49,191,000. The lack of navigable rivers makes transportation very difficult and expensive.

The revenue for the fiscal year 1888 was \$37,900,000, of which \$20,000,000 was from customs duties; the expenditure was \$38,587,239, more than one-third of which was for the army. The public debt in 1886 was stated at \$162,787,650. The army comprises 31,967 men, the navy only 5 gunboats.

Capital, Mexico, built in 1521, on Lake Tezcoco, over 8,000 feet above the sea level; population about 300,000.

Netherlands.

Netherlands, a kingdom of Western Europe; area, 12,727 square miles; population 1887, 4,450,870, nearly all natives of Holland. Revenue, 1888, \$47,641,140; expenditure, \$54,418,887; public debt, 1888, \$428,808,660. Army in 1887, 65,733 men; navy, 1886, 148 vessels, 503 guns, and 10,059 men. Imports, 1886, \$453,627,340; exports, \$361,982,615. Railways in 1886, 1,520 miles, more than half managed by the State; telegraphs, 3,089 miles. Post-offices, 1,800; letters carried in 1887, 65,894,692; journals, 52,646,830.

Nicaragua.

Nicaragua, one of the five republics of Central America—area, 58,000 square miles; population, 300,000 (estimated), one half of whom are Indians—is in large part covered with great forests, furnishing the finest mahogany, rosewood, and dye-woods. The

country has long been distracted by internal dissensions; it is governed by a president elected for 4 years, a cabinet of 4 ministers, a senate of 10 members, and an assembly of 11 representatives. The revenue amounted in 1886 to \$3,084,000, and the expenditure rather more, chiefly for the army and public debt of \$4,200,000. The exports amounted to \$4,781,850, and the imports to \$3,982,640. The principal exports were coffee, elastic gum, and gold and silver bullion.

Paraguay.

Paraguay, an inland republic of South America—area 91,980 square miles, population in 1886, 300,000—is a country without cities and almost without civilization. The language spoken is chiefly that of the Indians mixed with a little Spanish. The country achieved independence in 1811, and was ruled by the dictator, Dr. Francia, for 29 years, during which no foreigners were allowed to enter or leave Paraguay. Since 1870 the government, though nominally republican, has been under the control of Brazil. The country was formerly insolvent, owing \$286,000,000 to Brazil and the other allies as a legacy of the war, \$4,250,000 to Great Britain, and \$2,100,000 domestic debt, reduced in 1888 by selling national property to \$5,151,891. Revenue in 1887, \$1,153,526; expenses, \$1,305,000, besides interest and army. The imports in 1887, \$2,861,480, and the exports \$1,988,140. The army embraces 628 men, mostly now discharged to relieve the treasury of expense. The only railway in Paraguay is one of 45 miles, and the only telegraph is of the same length.

Peru.

Peru, a republic on the western coast of South America—area 432,297 square miles; population in 1876, 3,050,000—is governed, under a constitution adopted in 1868, by a president chosen for 4 years, a senate of 44, and a house of representatives of 110 members. The revenue for 1887 was \$16,133,644, about one ninth of which was from customs, the expenditures \$18,182,886; the public debt was \$367,226,840, the interest on the foreign debt being in default. The revenue is chiefly derived from the sale of guano and nitrate of soda. The importations of 1884 were \$10,563,448, and the exports \$7,453,828. The premium on specie is 62 per cent, and the domestic debt sells at 50 cents on the dollar.

The army consists of 4,000 men, besides 1,000 gendarmes and 1,200 vigilantes. During the war with Chili, lasting from 1879 to 1881, Peru put about 16,000 men in the field; the navy consisted of 2 steam vessels, well armed and equipped, of 3,396 horse-power, and 66 guns, among which were 7 ironclads and rams which were captured by the Chilians. The merchant marine in 1883 had 147 sailing ships and 8 steamers. In 1883 there were 1,612 completed miles of railway and 600 more in construction, Peru having gone into the most extensive railroad building in proportion to its inhabitants of any country. Silver is largely mined, the annual product being from 3 to 4 million dollars, and coinage is free and unlimited. Peru has a fertile soil, producing cotton, sugar, grapes, and olives, while the forests abound in the cinchona-tree, which yields the precious Peruvian bark, or quinine.

Capital, Lima; population in 1876, 101,488. Telegraph lines 1581 miles.

Portugal.

Portugal, a kingdom of Western Europe; area, 84,595 square miles; population 1881, 4,708,178. The legislative power is in a Cortes with a Chamber of 100 peers, appointed for life by the king, and a Chamber of Deputies 149, elected by the people. Revenue 1888, \$48,543,902; expenditure, \$44,247,756; public debt, 1887, \$490,496,594. Imports in 1887, \$46,789,000; exports, \$21,249,000. Army, 1888, 30,607; navy, 55 vessels, with 167 guns and 3,572 men. Railways in 1888, 1,178 miles; telegraphs, 3,086 miles; post-offices, 1,043; letters carried, 20,103,829 in 1887.

Russia.

Russia, an empire of Eastern Europe and Western Asia: total area, 8,138,541 square miles; population, 108,843,192. Revenue, 1888, \$547,202,880; expenditure, \$497,825,981; public debt, 1886, \$3,669,944,394, besides which loans and paper to the amount of \$340,000,000 have been issued. The cost of the war in 1877-78 with Turkey and her allies was stated officially in June, 1878, at 1,060 millions. The army in 1888 embraced 707,140 men; navy, 386 men-of-war with 936 guns. Imports, 1886, \$308,496,528; exports, \$254,194,110. Railways in 1888, 15,727; telegraphs, 72,050 miles. Post-offices, 5,277; letters carried, 150,348,689; postal cards, 15,833,646; journals, 156,100,275, in 1886. Amount of paper money (irredeemable) was in 1879, 850 millions, which is depreciated about 30 per cent.

Salvador.

Salvador (sometimes called San Salvador, the name of its capital city) is the smallest of the five Central American republics; area, 7,226 square miles; population in 1886, 634,120. It is governed by a president elected for 4 years, a ministry of 5 members, and a congress of 12 senators and 24 deputies, elected for 2 years. Suffrage is universal, except for servants and persons without legal occupation. Education, though

not general, is in advance of other Central American States; the Roman Catholic religion is recognized, but others protected. The army has 2,200 men. Revenue, 1887, \$4,315,145; expenditure, \$4,291,850; national debt, \$4,750,000; imports in 1886, \$3,460,000; exports, \$7,597,000, nearly one-half of which was coffee, and one-third indigo. About one-third the commerce of Salvador is with Great Britain.

Santo Domingo.

Santo Domingo, a republic of the West Indies, forms the larger portion of the island of Haiti, lying east of the republic of that name; area, 20,591 square miles; population in 1887, 504,000 (estimated), principally mixed Spaniards, Indians and negroes. The national language is Spanish, and the established religion Roman Catholic. The government is vested in a President elected for six years, who appoints a Council of four ministers, a Senate of 9 members also chosen for six years, and a house of 15 members. Revenue in 1887, \$1,484,434; expenditure, \$787,164; foreign debt contracted in London in 1869, \$5,392,437, which was partially scaled in 1885. Imports, \$2,104,360; exports, \$2,544,403, chiefly tobacco and sugar. The soil is of extraordinary fertility, the climate soft and inviting, and much more salubrious than any other part of the West Indies. Civilization is extremely backward, and public education neglected. There are literally no good roads on the island, transportation being almost wholly on the backs of horses and mules. The army consists of 4,000 men, and the navy of 5 small vessels, with 44 guns. The capital, Santo Domingo, has about 20,000 inhabitants.

Spain.

Spain, a kingdom of Western Europe; area, 193,171 square miles; population, 1886, 16,783,200. The legislative power is in the Cortes, a Senate, and a Chamber of Deputies elected for five years by indirect suffrage. Revenue, 1887, \$164,828,929; expenditure, \$164,248,985; public debt, 1886, \$1,266,456,840; imports, 1886, \$165,390,680; exports, \$121,889,465; army in peace, 131,400 men; navy, 175 vessels and 369 guns. Railways, 1887, 5,771 miles; telegraphs, 11,088 miles; post-offices, 3,069; letters carried, 1886, 102,810,820.

Sweden and Norway.

Sweden and Norway, a kingdom of Northwestern Europe; united under one sovereign, but having wholly distinct legislative governments and executive officers. Sweden has 170,927 square miles; population, 1887, 4,734,901; revenue, \$23,673,870; expenditure, \$23,539,652; public debt, 1888, \$66,412,279; army, 38,289 men; navy, 64 steamers and 6 small vessels, with 150 guns. Imports, 1886, \$81,368,820; exports, \$61,667,460. Nearly one half the commerce is with Great Britain. Railways, 4,580 miles, one-third operated by the State; telegraphs, 5,173 miles. Post-offices, 2,108; letters in 1886, 52,022,864.

Norway, 122,823 square miles; population, 1880, 1,913,000. Revenue, 1887, \$11,695,440; expenditure, \$12,149,258; public debt, 1887, \$37,596,079; imports, 1887, \$36,096,570; exports, \$28,789,560; army, 18,750 men; navy in 1886, 48 steamers and 6 small vessels, with 163 guns. Railways, 972 miles; telegraphs, 4,646 miles, nearly all operated by the government. Post-offices in 1887, 1,217; letters carried, 21,722,315; journals, 21,332,664.

Switzerland.

Switzerland, a republic of Central Europe; area, 15,908 square miles; population, 1884, 2,906,750 (census). By the federal constitution of 1874, the legislative body consists of a national council of 141 members, or one to every 20,000 inhabitants, elected for three years; and of a council of states of 44 members, two for each canton. The executive power is in a federal council, chosen for three years by the federal assembly (National Council and Council of States United), and in a President of the Swiss Confederation, elected for one year by the federal assembly from the members of the federal council. Revenue, 1887, \$11,519,181; expenditure, \$10,987,138; debt, \$7,543,573. Army (all men between 22 and 32), 123,031, besides the Landwehr, comprising all between 33 and 44, 80,248 in 1888. The commerce of Switzerland in 1887 was, imports, \$161,827,750; exports, \$190,118,640. Railways, 1,879 miles; telegraphs, 4,465 miles. Post-offices, 2,956; letters carried, 90,987,177; journals, 65,815,000.

Turkey.

Turkey, a monarchy of Southern Europe and Western Asia; area, 935,110 square miles; population in Europe, 8,866,500; in Asia, 16,629,980 (estimated) in 1879. The government is a constitutional monarchy since 1876, the Sultan being the irresponsible sovereign, convoking and dissolving the General Assembly at his pleasure. The ministers are responsible to the Chamber of Deputies; the Senate are nominated for life by the Sultan, and the deputies elected by secret ballot, one to every 150,000 males. The financial affairs of Turkey after the long war are greatly involved, the revenue being \$73,681,000, and the expenditures, \$76,495,000. Public debt amounted in 1887 to \$522,293,530. Imports, 1887, \$91,094,212, and exports, \$55,912,120. Army (compulsory service for 20 years), 182,000 men in time of peace; navy, 32 steam vessels and 49 sail vessels, and 1,600 guns. Railways, 920 miles; telegraphs, 14,500 miles.

Uruguay.

Uruguay, a republic of South America—area 72,151 square miles; population, 1886, 596,463 (estimated)—is governed by a President, a ministry of 4 cabinet officers, and a legislature composed of 13 Senators and 40 Representatives. The revenue in 1887 was \$14,739,000, three-fourths of which was from customs duties; the expenditures, \$13,422,000, nearly one-fourth of which was for the army and navy. The public debt in 1887 was \$72,205,722; paper money to the amount of \$6,000,000 was no longer current in commerce, though received by the government. Payment of interest on the debt has been lately resumed.

The imports in 1886 were \$20,200,000, and the exports \$23,800,000, of which 6 millions was hides.

The army consists of 4,052 men. 343 miles of railway are in operation, and 1,729 miles of telegraph. There are 438 post-offices; letters mailed in 1886, 3,146,365. Capital, Montevideo; population, 1885, 115,462. About half the property of the republic belongs to foreigners, principally Spaniards, Italians, and Brazilians.

Venezuela.

Venezuela (United States of), a republic formed after the dissolution of the old republic of Colombia, dates from the constitution of 1864. It has 439,119 square miles, and 2,198,820 inhabitants in 1886. The confederation consists of 20 States, besides the federal district, each having its own distinct government, and electing delegates to the Congress, which meets annually at Caracas, the capital city, of 70,078 inhabitants. The President is elected for two years.

The revenue for 1887 was \$6,512,673, four-fifths of which came from customs and tonnage duties; the expenditure, \$5,844,910. The public debt in 1887 was \$20,556,260, payment of interest on which was resumed in 1875. The imports were \$12,074,820 in 1886, and the exports \$15,912,162, chiefly coffee and cocoa. The only railway, 102 miles long, was opened in 1877. The army consists of 3,000 men.

* The larger figures in this column mark the terms held by the Presidents, and are referred to in succeeding tables. The smaller figures indicate the numerical order or sequence of individual officers from the first. Terms marked a denote the succession of the Vice-President to the Presidency for the residue of the term.

1. Died in office.
2. Resigned the Vice-Presidency, December 28, 1832.
NOTE.—Presidents of the Senate *pro tem.*, sometimes included in the lists of Vice-Presidents, are omitted above. Although next in succession to the Presidency, by the death or succession to that office of the Vice-President, prior to act of Jan. 19, 1886, no President *pro tem.* of the Senate was Vice-President elect. There have been ten Presidential terms in which the office of Vice-President was vacant for a time. On these occasions the following-named persons were Presidents *pro tem.* of the Senate: W. H. Crawford, 1812-13; J. Gaillard, 1814-17; H. L. White, 1832-33; S. L. Southard, 1841-42; W. P. Mangum, 1842-45; W. R. King, 1850-53; D. R. Atchison, 1853-54; J. D. Bright, 1854-57; L. S. * The figures before the names of the Associate Justices indicate the order of their appointment. The numbers following refer to the same numbers in the first column, and show the vacancy filled by each appointment.

¹ Resigned.

² Retired under act of April 10, 1869, permitting judges of any of the courts of the United States to resign, with full salary for life, after reaching the age of 70, provided they have served ten years continuously.

³ Retired under special act of Jan. 27, 1882.

⁴ Presided one term of the Court; appointment not confirmed by the Senate.

[†] The Supreme Court, at its first organization in 1790, consisted of a Chief-Justice and five Associate Justices. The number of Associate Justices was increased to six in 1807 by the appointment of Thomas Todd; increased to eight in 1837 by the appointments of John Catron and John McKinley; increased to nine in 1863 by the appointment of Stephen J. Field; decreased to eight on the death of John Catron in 1865; decreased to seven on the death of James M. Wayne, in 1867; and again increased to eight in 1870 by the appointment of Joseph P. Bradley.

NOTE.—To determine the years covered by a given Congress, double the number of the Congress, and add the product to 1789; the result will be the year in which the Congress closed. Thus, the 35th Congress = $70 + 1789 = 1859$, that being the year which terminated the 35th Congress, on the 4th of March. To find the number of a Congress sitting in any given year, subtract 1789 from the year; if the result is an even number, half that number will give the Congress, of which the year in question will be the closing year. If the result is an odd number, add one to it, and half the result will give the Congress, of which the year in question will be the first year.

50th Congress.—March 4, 1887, to March 4, 1889.

The salary of Senators is \$5000 per annum; mileage, 20 cents per mile of travel to and from Washington, each annual session; allowance for stationery and news papers, \$125 per annum. President of the Senate, *pro tempore*, \$8000.

NOTE.—The Salaries of Internal Revenue Collectors are graduated annually in proportion to the amount of revenue collected by each—the maximum salary being limited to \$4,500 by law.

The numbers of collection districts are those retained when the districts in various States were consolidated by law, and those bearing the intervening numbers were abolished.

By executive orders, Sept. 5, 1883, and May 21, 1887, 65 Internal Revenue Collectors were dispensed with, their districts being consolidated with others in the above table.

UNITED STATES CONSULAR SERVICE.

The following table includes all consuls, consuls-general, and commercial agents of the United States, the amount of whose compensation reaches \$1,000, or upward, annually. By the statutes of the United States the salaried consulates are divided into seven classes, besides other subdivisions, with specific fixed salaries for each, as follows:

Five consulates at...	\$6,000	Twenty-three consulates at.....	\$3,000
Three " at.....	5,000	Twenty-five " at.....	2,500
One consulate at.....	4,500	Fifty-two " at.....	2,000
Five consulates at.....	4,000	Sixty-eight " at.....	1,500
Eight " at.....	3,500	Twenty-six " at.....	1,000

By law all consuls receiving a fixed salary are required to pay into the Treasury, without reduction, all fees received by virtue of their offices. At some other consulates and consular agencies the fees collected form the sole compensation of the incumbent, which, however, is limited in the case of consular agents to a maximum of \$1,000; and such agents are allowed to transact business. The compensation of the feed consuls is limited to \$2,500. If the fees exceed that sum, such consuls can pay clerk-hire from the fees received at the consulate when specially authorized, but not otherwise. The column of fees shows the amount of fees received at each consulate and agency from which returns have been made for the fiscal year ending June 30, 1888.

Corrected at the Department of State, December, 1888.

C.A. means Commercial Agent ; A. Agent ; C.G. Consul-General ; C.C. Consular Clerk.

THE ARMY OF THE UNITED STATES.

[Summarized from the Annual Report of the General Commanding the Army, October, 1888.]

The Army of the United States on the 30th of June, 1888, consisted of the following forces, in officers and men :

	Officers.	Enlisted Men.
Ten cavalry regiments.	487	6,842
Five artillery regiments	283	2,437
Twenty-five infantry regiments.....	885	10,563
Engineer, battalion, recruiting parties, ordnance department, hospital service, Indian scouts, West Point, Signal detachment, and general service....	584	3,366
Total.....	2,189	23,208

For convenience, and to fix responsibility, the country is divided into three military divisions, each with several departments, as follows :

1. Military division of the Missouri, commanded by Major-General George Crook, headquarters Chicago, comprehends the departments of the Missouri (Brig.-Gen. Wesley Merritt); Texas (Brig.-Gen. David S. Stanley); Dakota (Brig.-Gen. Thomas H. Ruger); and the Platte (Brig.-Gen. John R. Brooke). There are 7 regiments of cavalry and 19 of infantry in this division.
2. Military division of the Atlantic, commanded by Major-General Oliver O. Howard, headquarters New York. Includes department of the East (Major-General Howard). This division comprises 4 regiments of artillery and 2 of infantry.
3. Military division of the Pacific, commanded by Brig.-General Nelson A. Miles, headquarters San Francisco. Includes departments of California (Brig.-General N. A. Miles); the Columbia (Brig.-General John Gibbon); Arizona (Col. B. H. Grierson); comprises 1 regiment of artillery, 3 of cavalry, and 4 of infantry.

The maximum military force allowed under existing laws is 2,155 commissioned officers and 25,000 enlisted men. The Report of the Lieutenant-General of the Army exhibits the actual number in service as 2,189 officers and 23,208 enlisted men. The following table exhibits the number in each rank of the army:

1. COMMISSIONED OFFICERS: Colonels, 70; lieutenant-colonels, 91; majors, 226; captains, 616; adjutants, 40; regimental quarter-masters, 40; first lieutenants, 563; second lieutenants, 459; chaplains, 34.

*The maximum pay of colonels is limited to \$4,500, and of lieutenant-colonels to \$4,000.

The law provides for the retirement from active service of any commissioned officer who has served 30 years as such, on his own application, at the discretion of the President; or for placing on the retired list, unconditionally, after 40 years service, any officer applying to be retired: or, if 45 years of actual service, or 62 years of age is reached, an officer may be retired at the discretion of the President.

The number of officers on the retired list is limited to 400 by law. The pay is fixed at 75 per cent. of the pay allotted to the rank of officers in active service at the time of retirement.

QUARTERS, FUEL AND FORAGE ALLOWED TO ARMY OFFICERS.

By Act of June 18, 1878, all allowance or commutation for fuel was prohibited, but wood is furnished at \$3 per cord, out of the pay of officers. Forage is furnished only in kind, and only to officers actually in the field or west of the Mississippi, on the basis of five horses for the General of the Army, four for the Lieutenant-General, three each for a major or a brigadier-general, and two each for a colonel, lieutenant-colonel, major, mounted captain or lieutenant, adjutant and regimental quartermaster. Quarters are furnished on the following basis: General, (commutation for quarters,) \$125 per month; Lieutenant-General, \$100 per month; major-general, six rooms; brigadier-general or colonel, five rooms; lieutenant-colonel or major, four rooms; captain or chaplain, three rooms; and first or second lieutenant, two rooms—all of which may be commuted at \$12 per room per month.

NOTE.—The law provides that no allowances shall be made to officers in addition to their pay, except quarters and forage furnished in kind.

Mileage at the rate of eight cents per mile is allowed for travel under orders.

The pay of cadets at the U. S. Military Academy, West Point, was fixed at \$540 per annum, by Act of Aug. 7th, 1876, instead of \$500 and one ration *per diem*, (equivalent to \$609.50) by former laws.

The pay of private soldiers runs from \$156, (\$13 a month and rations,) for first two years, to \$21 a month and rations, after twenty years service.

The following is a list of generals who have commanded the army since 1775, with the dates of command as far as can be ascertained from the official records :

Major-General George Washington, June 15, 1775, to December 23, 1783.

UNITED STATES MILITARY ACADEMY.

The U. S. Military Academy at West Point was founded in 1802. Each Congressional District and Territory—also the District of Columbia—is entitled to have one cadet at the Academy; the cadet to be named by the Representative in Congress. There are also ten appointments at large, specially conferred by the President of the United States. The number of students is thus limited to 344. Appointments are usually made one year in advance of date of admission, and may be made either after competitive examination or given direct, at the option of the Representative. The Congressman, should he desire, may nominate a legally qualified *alternate*, who will be examined *with the regular nominee*, and admitted in the event of his success and the latter's failure to pass the prescribed preliminary examinations.

Appointees to the Military Academy must be between 17 and 22 years of age, free from any infirmity, and able to pass a careful examination in reading, writing, orthography, arithmetic, grammar, geography, and history of the United States.

The course of instruction, which is quite thorough, requires four years, and is largely mathematical and professional. The principal subjects taught are mathematics, French, drawing, tactics of all arms of the service, natural and experimental philosophy, chemistry, mineralogy, geology, and electricity, history, international, constitutional, and military law, Spanish, and civil and military engineering and science of war. About one fourth of those appointed usually fail to pass the preliminary examination, and but little over one half the remainder finally graduate.

The discipline is very strict, even more so than in the army, and the enforcement of penalties for offences is inflexible rather than severe. Academic duties commence September 1 and continue until June 1. Examinations are held in January and June, and cadets found proficient in studies and correct in conduct are given the standing in their class to which their merits entitle them, while those deficient in either conduct or studies are discharged.

From about the middle of June to the end of August cadets live in camp engaged only in military duties and receiving practical military instruction.

The pay of a cadet is \$540.00 per year, and with proper economy is sufficient for his support. The number of students at the academy is usually about 300.

Upon graduating cadets are commissioned as second lieutenants in the U. S. army. The whole number of graduates from 1802 to 1887 has been 3,231.

NOTE.—Officers of the Navy must be retired from active service after sixty two years of age, or may be retired after forty years' service, irrespective of age (except in certain grades). The pay of retired naval officers is 75 per cent of the sea-pay of the rank held at the time of retirement.

THE NAVY OF THE UNITED STATES.

Condensed from the Navy Register of 1888, and the Annual Report of the Secretary of the Navy, December, 1888:

There were in the service in 1888, 46 naval steam-vessels—all screw-propellers except two, besides 12 wooden sailing-vessels, 20 iron-clad vessels, 1 torpedo-ram, and 12 tugs: total, 91, all rated as serviceable, besides which there are 6 unserviceable vessels. The number of guns is 490.

The active list of the Navy is composed of 1 admiral, 1 vice-admiral, 6 rear-admirals, 10 commodores, 45 captains, 85 commanders, 74 lieutenant-commanders, 250 lieutenants, 75 lieutenants junior grade, 178 ensigns, 69 naval cadets (who have passed the four years' academic course, and are performing two years' service at sea before final graduation), and 174 naval cadets on probation at the Naval Academy, all of whom are officers of the line.

Of the staff there are 1 surgeon-general, 15 medical directors, 15 medical inspectors, 50 surgeons, 58 passed assistant surgeons, 19 assistant surgeons, 1 paymaster-general, 18 pay directors, 18 pay inspectors, 45 paymasters, 24 passed assistant paymasters, 15 assistant paymasters, 1 engineer-in-chief, 70 chief engineers, 79 passed assistant engineers, 51 assistant engineers, 22 chaplains, 12 professors of mathematics, 1 secretary for the admiral and 1 for the vice-admiral, 1 chief constructor, 8 naval constructors, 11 assistant constructors, and 10 civil engineers.

The warrant officers consist of 85 boatswains, 84 gunners, 50 carpenters, 28 sailmakers, and 84 mates.

The retired list is composed of officers of the line, as follows: 50 rear-admirals, 15 commodores, 10 captains, 11 commanders, 22 lieutenant-commanders, 27 lieutenants, 17 lieutenants junior grade, 12 ensigns. Staff officers, viz.: 20 medical directors, 5 medical inspectors, 7 surgeons, 6 passed assistant surgeons, 5 assistant surgeons, 8 pay directors, 2 pay inspectors, 3 paymasters, 2 passed assistant paymasters, 1 assistant paymaster, 21 chief engineers, 26 passed assistant engineers, 26 assistant engineers, 2 civil engineers, 3 naval constructors, 7 chaplains, and 4 professors of mathematics. Warrant officers, viz.: 19 boatswains, 19 gunners, 8 carpenters, and 12 sailmakers.

The active list is therefore composed of 968 officers of the line, 536 officers of the staff, and 181 warrant officers; total 1,685 officers of all grades.

The retired list is composed of 164 officers of the line, 144 officers of the staff, 58 warrant officers, and 4 professors of mathematics; total, 370.

There were (July, 1888) in the service, provided for by the Navy appropriation act for the fiscal year 1889, 7,500 enlisted men, and 750 boys.

The marine corps consists of 88 commissioned officers, 373 non-commissioned officers, 80 musicians, 96 drummers and fifers, and 1500 enlisted men; total, 2,077.

THE UNITED STATES NAVAL ACADEMY AT ANNAPOLIS.

The United States Naval Academy was opened October 10, 1845, and the credit of its foundation is attributed to Hon. George Bancroft, then Secretary of the Navy, under President Polk. The course of instruction, designed to train midshipmen for the Navy, at first occupied five years, of which three were passed at sea. Various changes have been made in the course of instruction, which was made seven years in 1850, four years in 1851, and six years (the last two of which are spent at sea,) March 3, 1873, where it now remains. The Naval Academy, first located at Annapolis, Maryland, was removed to Newport, R. I., in May, 1861, but re-established at Annapolis in September, 1865, where it now is, occupying lands formerly known as Fort Severn. The Academy is under the direct care and supervision of the Navy Department. There are to be allowed in the Academy one naval cadet for every member or delegate to the House of Representatives, appointed at his nomination, one for the District of Columbia, and ten appointed at large by the President. The number of appointments which can be made is limited by law to twenty-five each year, named by the Secretary of the Navy after competitive examinations, the cadets being from 14 to 18 years of age. The successful candidates become students of the Academy and receive the pay of naval cadets—\$500 per annum. Cadets who graduate are appointed in the order of merit to the lower grades of the line and engineer corps of the Navy and of the marine corps, as fast as vacancies occur. But such appointments cannot be made in excess of vacancies, and graduates who receive no appointments get an honorable discharge with one year's sea pay. The course of instruction is thorough, involving a close pursuit of mathematics, steam engineering, physics, mechanics, seamanship, ordnance, history, law, etc. The whole number of students in 1887 was 174. The graduating class of 1887 numbered 43 members.

Appointed by Governor. Salary, Chief Justice and Chancellor, \$2,500 each; Associate Justices, \$2,200. Clerk, Joseph Burchnell.

Amount of State debt, December 22, 1888, \$854,750 all funded at 4 per cent.

The State holds interest-paying securities (railroad, etc.) to the amount of \$1,168,799, and is actually out of debt. The annual receipts were \$121,190.61 in 1888, and the annual expenditures \$120,028.24 for year ending December 22, 1886. Of the tax receipts no less than \$64,150 was from licenses, \$40,428 from tax on railroads and passengers, and nothing from taxes on real and personal property, in the whole State. It results that Delaware is the least-taxed community in the Union, so far as the expenses of State government are concerned. There is no State valuation of property for taxation.

Electors must have paid a County tax, assessed at least 6 months before election to entitle them to suffrage.

JUDICIARY. SUPREME COURT.—*Chief Justice*, Peter Turney; *Associates*, W. C. Caldwell, D. L. Snodgrass, H. H. Lurton, W. C. Folks; term of office for each, 8 years; elected by the people; salary of each, \$4,000.

Amount of State debt, January 1, 1888, principal and interest about \$17,000,000.

By the Compromise and Funding Act of May 20, 1882, Tennessee funded its "legally issued bonds," with all accrued interest thereon, at 60 per cent of the face value, in new 30-year bonds of 1882, bearing 3 per cent for two years, 4 per cent next two years, 5 per cent for next two years, and 6 per cent for remaining 24 years. About eight millions of these compromise bonds were issued up to July, 1883. The State Legislature in 1883 repealed this act, and funded the debt at 50 per cent face value, with 3 per cent interest, except the old State debt proper of \$2,118,000, for which new 6 per cent. bonds are issued at face value. Up to January 1, 1886, \$22,000,000 bonds have been funded, leaving about \$5,728,000 unfunded.

State receipts, for two years ending December 19, 1888, \$3,694,996.37.

State expenditures, for two years ending December 19, 1888, \$3,408,761.69.

Amount raised by taxation, 1886: State, about \$1,000,000, of which merchants' licenses paid \$115,739; tipplers' licenses, \$141,533; other privilege taxes, \$77,000, and about \$600,000 property-tax.

Amount of property as assessed, 1887: Real, \$211,267,498; personal, \$28,282,583; railway property, \$32,361,855. Total, \$271,911,936. Rate of State Tax, 1887, 30 cents on each \$100.

A State Poll-tax of \$1.00 is levied for schools, producing in 1880, \$232,472.

JUDICIARY, SUPREME COURT.—*Presiding Judge*, Adam C. Snyder. *Judges*, Henry Brannon, L. W. English, Thomas C. Green; elected by the people for 12 years; salary, \$2,250 each. Clerk, O. S. Long.

West Virginia has no debt (unless the share of that State in the *ante-bellum* State debt of Virginia is reckoned such), the State Constitution having prohibited the creation of any debt by the Legislature, except in an emergency, like rebellion or invasion. After the admission of the State, in 1863, Virginia claimed that one third of her State debt of \$45,000,000 should be paid by West Virginia, and left out \$15,289,271 in the adjustment of her debt. West Virginia claims that a very much smaller sum is her share and the matter remains unadjusted.

State Receipts for year ending Oct. 1, 1888, \$1,205,119.71.

State Expenditures for year ending October 1, 1888, \$1,227,288.98.

Amount of taxable property as assessed, 1886: Real, \$119,414,484; personal, \$44,469,225; railroad, \$15,185,650; total, \$179,069,309. Rate of State tax, 25 cents on each \$100.

Amount raised by taxation year ending October 1, 1886, \$766,205.00, of which \$68,246 was from license tax, \$32,540 railroad tax, and \$443,000 from property tax. A capitation tax of \$1 is levied for school purposes, producing \$120,715 in 1880.

¹ NOTE.—The Capital of West Virginia was removed from Wheeling to Charleston, in May, 1885.

* Clerk of the District Court, and *ex-officio* Secretary and Treasurer.

The Territory of Alaska was purchased by the United States from the Russian Government in 1867 for the sum of \$7,200,000. By act of Congress in 1870 Alaska was made a military and collection district, the Territory remaining unorganized. The laws of the United States relating to customs, commerce, and navigation were extended over it by act of July 27, 1868, cognizable by the United States Courts of Washington, Oregon, and California, and the same statute made it unlawful to kill fur-seals except under regulations of the Secretary of the Treasury under lease to the Alaska Commercial Company at \$55,000 per annum.

By act of May 17, 1884, "providing a civil government for Alaska," Congress created a District Government providing for a Governor, a District Court (sitting at Sitka in May, and at Wrangell in November). The clerk of this court is made *ex-officio* Secretary and Treasurer of the District of Alaska. He is also recorder of deeds, mortgages, and mining claims, and register of wills. A United States Marshal and District Attorney were provided for. The act further creates four Commissioners having the powers of Commissioners of the United States Circuit Courts, and of Justices of the Peace, to reside at four designated settlements in Alaska, to hold courts of record subject to the supervision of the District Judge in all testamentary and probate matters, habeas corpus, etc.

The laws of Oregon are declared to be the law in the District of Alaska when not in conflict with those of the United States. The act appropriates the sum of \$25,000 for education without reference to race, under direction of the Secretary of the Interior.

Alaska is created a land-district with a land-office at Sitka, with the Marshal as Surveyor-General, the Clerk as Receiver of Public Money, and the Commissioner residing at Sitka as *ex-officio* register of the land-office. The value of the Alaska fisheries in 1880 was \$2,661,640, being surpassed by only seven States in the Union.

Dakota alone, of all the Territories, has eight Justices of the Supreme Court, appointed by the President and Senate.

North Dakota numbered, in 1888, 37 counties, with a tax valuation of about \$71,000,000. South Dakota, with 49 counties, had an assessed valuation in 1888 of about \$90,000,000.

A division of the Territory, which is of great extent, surpassing in area any other of the organized Territories (having 149,100 square miles, or 95,424,000 acres), has been persistently urged, and is favored by a great majority of the inhabitants. A bill for the partition of the Territory and the admission of North and South Dakota to the Union as two new States has passed Congress, and the year 1889 will see this accomplished.

Dakota is preëminently an agricultural Territory, its chief element of wealth being the wheat crop. The grain produced is claimed to be superior to any other wheat, having the least moisture in the grain.

The capital of the Territory was removed from Yankton to Bismarck in 1883. The principal towns are Fargo, in North Dakota (with a tax valuation of \$6,624,136), Sioux Falls, Jamestown, Bon Homme, Grand Forks, Deadwood, Bismarck, and Yankton. There are ten United States Land-offices in Dakota, and nearly two million acres in homestead settlement and cash-entry claims were made in 1888. The population of the Territory numbered 135,177 in 1880, and was returned upon the basis of the census taken in June, 1885, at 415,263 inhabitants. In June, 1888, the Commissioner of Immigration estimated the population at 640,823.

Amount raised by taxation, year ending Dec. 1, 1888, \$450,164. Territorial expenditure, year ending Dec. 1, 1888, \$509,569. Territorial receipts, year ending Dec. 1, 1888, \$457,897.41. Rate of Territorial tax, 1888, 3 mills on the dollar, or 30 cents on \$100.

Territorial debt, November, 1888, \$1,098,800, contracted principally for public buildings, at 5 and 6 per cent.

Valuation of property, 1888, real, \$118,000,000; personal, \$43,420. Total, \$161,420,000.

NOTE.—Numerous variations in the Presidential vote are found in the different tables published. One principal source of discrepancy is in taking the vote for different Electors, of either party, as representing the vote for President. As the votes for Electors vary greatly, some tables take the highest vote cast for any one Elector; others the highest cast for any Elector-at-large; and others still, the average vote cast for all the Electors of each party.

¹ California cast 1,591 votes for Curtis, American candidate for President.
² New York cast 2,668 votes for Cowdry, United Labor candidate for President, 2,068 votes for the Socialist candidate, and 811 mixed scattering votes.

Per Cent. of Increase from 1870 to 1880:—

Total Population.....	80.08 per cent.	Colored Population.....	34.67 per cent.
White Population.....	22.20 " "	Chinese Population.....	66.73 " "

NOTE.—The inhabitants of Alaska and the Indian Territory (both unorganized as yet) are not included in the above total. The census of Alaska in 1880 showed: White, 392; creoles (issue of intermarriages between the whites and natives), 1,683; Aleuts, 1,960; Innuits, 17,488; Indians, 8,655; total, 30,178.

The Indian Territory is estimated to contain 60,000 to 75,000 inhabitants. The Indians included in the census in each State and Territory are those reckoned as civilized, or outside of tribal organizations. Indians not taxed are by law excluded from the census. Estimates of their numbers vary widely—from 200,000 to 350,000 (the latter as estimated in the census of 1870), while the latest census or estimate of the Indian agencies, as reported in 1881 to the Commissioner of Indian Affairs, gives 246,417 Indians, excluding Alaska. The whole population of the United States exceeds 50,500,000, including Indians and Alaska.

In the Chinese column (from want of space elsewhere) have been reckoned 148 Japanese

POPULATION OF THE UNITED STATES IN 1870 AND 1880.

From the Official Returns of the Tenth Census, 1880, as revised in 1882.

NOTE.—In cases where counties are left blank, they have usually been consolidated with other counties, or have been organized since the date of the former census.

Population of the Towns and Cities of the United States having a population of 4,000 or upwards in 1880, compared with the Census of 1870.

(From the Official Returns of the Tenth Census, corrected in 1882.)

NOTE.—In previous editions of the American Almanac, the population of places having over 7,500 inhabitants in 1880 was given, including in many cases the population of entire townships exceeding that number of people. The present list embraces all cities and villages numbering 4,000 inhabitants or upwards, without regard to township boundaries, which would in many cases increase the aggregate to larger figures.

UNITED STATES POSTAL REGULATIONS,

As Revised under Act of March 3d, 1885.

First-Class Mail Matter.

LETTERS.—This class includes letters, postal cards, and anything sealed or otherwise closed against inspection, or anything containing writing not allowed as an accompaniment to printed matter, under class three.

Postage—2 cents each ounce, or additional fraction of an ounce, to all parts of the United States.

On local or drop letters, at free-delivery offices, 2 cents. At offices where there is no free delivery by carrier, 1 cent.

Prepayment by stamps invariably required. Postal cards, 1 cent.

Registered letters, 10 cents in addition to the proper postage. The Post-Office Department or its revenue is not by law liable for the loss of registered mail matter.

For *immediate* delivery, 10 cents additional postage, prepaid by special stamp, only at offices designated by the P. O. Department.

Second-Class.

REGULAR PUBLICATIONS.—This class includes all newspapers, periodicals, or matter exclusively in print and regularly issued at stated intervals as frequently as four times a year, from a known office of publication or news agency. Postage, 1 cent a pound or fraction thereof, prepaid by special stamps. Publications designed primarily for advertising or free circulation, or not having a legitimate list of subscribers, are excluded from the pound rate, and pay third-class rates. On newspapers and periodicals mailed by other than publishers or news agents, 1 cent for each 4 ounces or fractional part thereof.

Third-Class.

Mail matter of the third class includes books, circulars, unsealed publications for advertising purposes, and other matter wholly in print, legal and commercial papers filled out in writing, photographs, proof-sheets, corrected proof-sheets, and manuscript copy accompanying the same.

MS. unaccompanied by proof-sheets, letter rates.

Limit of weight, 4 pounds each package, except single books—weight not limited.

Postage, 1 cent for each 2 ounces or fractional part thereof—invariably prepaid by stamps.

Fourth-Class.

Embraces merchandise and all matter not included in the first, second, or third class, which is not liable to injure the mail matter. Limit of weight, 4 pounds.

Postage, 1 cent each ounce or fraction thereof, prepaid.

All packages of matter of the third or fourth class must be so wrapped or enveloped that their contents may be examined by postmasters without destroying the wrappers.

Matter of the second, third, or fourth class containing any writing, except as here specified, or except bills and receipts for periodicals, or printed commercial papers filled out in writing, as deeds, bills, etc., will be charged with letter postage; but the sender of any book may write names or addresses therein, or on the outside, with the word "from" preceding the same, or may write briefly on any package the number and names of the articles inclosed.

Postal Money Orders.

An order may be issued for any amount, from one cent to one hundred dollars, inclusive, but fractional parts of a cent cannot be included.

The fees for orders are: On sums not exceeding \$5, 5 cents; \$5 to \$10.....8 cents.
\$10 to \$15.....10 cents. | \$50 to \$60.....30 cents.
\$15 to \$20.....15 " | \$60 to \$70.....35 "
\$20 to \$30.....20 " | \$70 to \$80.....40 "
\$30 to \$40.....25 " | \$80 to \$100.....45 "
\$40 to \$50.....25 "

When a larger sum than 100 dollars is required, additional orders must be obtained; but no more than *three* orders will be issued in one day from the same post-office to the same remitter in favor of the same payee.

POSTAL NOTES, for any sum under *five* dollars, are sold at any money-order post-office—price 8 cents each. These are payable to the bearer, at any designated post-office, within three months after their date.

Free Delivery.

The free delivery of mail matter at the residences of people desiring it is required by law in every city of 50,000 or more population, and may be established at every place containing not less than 20,000 inhabitants. Number of free-delivery offices, 178.

The franking privilege was abolished July 1, 1878, but the following mail-matter may be sent free by legislative saving-clauses, viz.:

1. All public documents printed by order of Congress, the Congressional Record and speeches contained therein, franked by members of Congress or the Secretary of the Senate, or Clerk of the House.

2. Seeds transmitted by the Commissioner of Agriculture, or by any member of Congress, procured from that department.

3. All periodicals sent to subscribers within the county where printed.

4. Letters and packages relating exclusively to the business of the Government of the United States, mailed only by officers of the same, publications required to be mailed to the Librarian of Congress by the copyright law, and letters and parcels mailed by the Smithsonian Institution. All these must be covered by specially printed "penalty" envelopes or labels.

All communications to Government officers, and to or from members of Congress, are required to be prepaid by stamps.

NARRATIVE AND CRITICAL HISTORY OF AMERICA

WITH BIBLIOGRAPHICAL AND DESCRIPTIVE
ESSAYS ON ITS HISTORICAL SOURCES
AND AUTHORITIES.

Illustrated.

EDITED BY JUSTIN WINSOR, LL.D.,

Librarian of Harvard University,

with the co-operation of a committee from the Massachusetts Historical Society, and with the aid of other learned Societies. In eight royal octavo volumes.

The following volumes are now ready:—

1. America before Columbus.
2. Spanish Discoveries and Conquests in America.
3. English Discoveries and Settlements in America.
4. French Discoveries and Settlements in America, with Chapters on the Dutch and Swedes.
5. The French and English in North America, from the English Revolution to the Peace of Paris, 1689–1763.
6. The United States of North America. Part I.
7. The United States to the close of the Mexican War. Part II.

In Preparation.

8. The Later History of British and Spanish America.

This work has enlisted the co-operation of the most learned historical students and writers of America. Professor H. B. Adams, of Johns Hopkins University says of it: "The general idea of the 'Narrative and Critical History of America' is indicated by the title. Each important division of the work is treated in two ways: (1) in a descriptive manner, for the general reader; (2) in a critical manner, for the scholar, with primary reference to the sources of information. It is this latter portion of the task which shows, in its fullest and freest scope, the editorial talent of Harvard's librarian. A thousand and one skilful bibliographical touches by Mr. Winsor indicate how he has improved and supplemented the special work of his co-laborers.

"Only an historian who is also a librarian, or who commands the best and fullest resources of historical science in a librarian's environment, could do such work."

This work is sold only by subscription.

THE AMERICAN ALMANAC & TREASURY OF FACTS,

STATISTICAL, FINANCIAL AND POLITICAL,

Edited by AINSWORTH R. SPOFFORD, Librarian of Congress,

Contains this year more than its usual variety of official and statistical information. This work, now in its tenth year of publication, gives, in the most compact form for ready reference, all the most important facts concerning American Agriculture, Manufactures, Mining, Shipping, Railroads, Telegraphs, Banks, Post Offices, Public Lands, Pensions, Patents, Education, Currency, Revenue and Expenditure, Taxation, Prices, Tariff, Imports and Exports, Public Debts, Investments, Army and Navy, etc. The book contains an Official Directory of Congress and the Executive and Judicial Officers of the Government, with full Tables of the Administrations and Presidential Elections, from the beginning. To these is added a view of each State in the Union, with a list of State Officers, Finances, etc., and a succinct view of Foreign nations, with notable events and obituaries of the year.

THE UNITED STATES CENSUS of 1880, so far as officially tabulated, is also embraced. The book contains the essence of hundreds of volumes of public documents and other books. Also, the full vote of every county in the United States at the Presidential and Congressional elections.
